NARAYANA ENGINEERING COLLEGE::GUDUR 🤷

AUTONOMOUS

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

B.Tech – CSE - Course Structure, w.e.f AY:2020-21

DEPARTMENT VISION & MISSION

VISION OF THE DEPARTMENT

• To produce globally competent software professionals in the field of computer science and engineering to meet the needs of industry and society along with research and consultancy, lifelong learning, leadership qualities and ethics.

MISSION OF THE DEPARTMENT

• To deliver quality technical education by practicing innovative teaching learning processes making student's self-sufficient individuals

- To inculcate innovative thinking and problem solving skills in learners through training programs and collaborative interaction with industry.
- To develop professional behaviour with strong ethical values, leadership qualities and lifelong learning by providing value based education

PEOs, POs, PSOs

PEOs

PEO 1: To attain higher position in career by exhibiting expertise in solving real world problems.

PEO 2: Fill technical gaps and take leadership roles and achieve substantive results for the

development of organization.

PEO 3: Adapt to rapidly changing technologies through lifelong learning.

POs

1. Engineering knowledge: Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.

2. Problem analysis: Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.

3. Design/development of solutions: Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.

4. Conduct investigations of complex problems: Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.

5. Modern tool usage: Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

6. The engineer and society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.

7. Environment and sustainability: Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

8. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

9. Individual and team work: Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.

10. Communication: Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

11. Project management and finance: Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.

12: Life-long learning: Recognize the need for, and have the preparation and ability to

engage in independent and life-long learning in the broadest context of technological change.

PSOs

PSO 1: Software Product Development: Apply the principles and practices of software Engineering for developing quality software applications

PSO 2: Employment: Get employed in industries through their knowledge attained in Basic and advanced programming languages, specialized software packages or become an entrepreneur.

MODULE – 1 Fundamentals of Computers and Programming

8H

7 H

Fundamentals of computers: History of Computers, Generations of Computer, The Computer System - The Input-Process-Output Concept, Components of Computer System, Operating System - Introduction, Objectives, Functions.

Introduction to Programming, Algorithms and Flowcharts: Programs and Programming, Programming languages, Compiler, Interpreter, Structured Programming Concept, Algorithms, Flowcharts, How to Develop a Program.

Fundamental Algorithms: Exchanging the values of Two Variables, Counting, Summation of a set of numbers, Factorial computation, Generation of the FibonacciSequence, Reversing the digits of an integer.

At the end of the Module 1, students will be able to:

MODULE -2

- 1. Illustrate the working of a Computer. (BL 2)
- 2. Solve problems using language independent notations. (BL 3)
- 3. Understand the compilers and interpreters. (BL 2)
- 4. Understand Structured Programming. (BL 2)
- 5. Develop algorithms and flowcharts for problems.(BL 3)

Basic Elements of C

Basics of C: Introduction, Character Set, Structure of a C Program, A Simple C Program, Variables,

| Keywords, Constants, Assignment, and Initialization. Operators and Expressions: Arithmetic Operators, Relational Operators, Logical Operators, Bitwise Operators, Conditional Operator, Comma operator, size of operator, Expressions, L values and H values, Expression Evaluation-Precedence and Associativity, Type Conversion. At the end of the Module 2, students will be able to: |
|--|
| Operators, Conditional Operator, Comma operator, size of operator, Expressions, L values and H values, Expression Evaluation- Precedence and Associativity, Type Conversion. At the end of the Module 2, students will be able to: |
| values, Expression Evaluation- Precedence and Associativity, Type Conversion. At the end of the Module 2, students will be able to: |
| At the end of the Module 2, students will be able to: |
| |
| |
| 1. Understand the basic structure of a program in C. (BL - 2) |
| 2. Understand tokens in C language. (BL - 2) |
| 3. Illustrate the working of expressions.(BL - 2) |
| 4. Understand the precedence and Associativity rules of operators. (BL - 2) |
| 5. Understand the rules of type conversion. (BL - 2) |
| MODULE-3 Data Input / Output and Control Statements 8 H |
| nput and Output: Basic Screen and Keyboard I/O in C, Formatted Input and Output, Unformatted |
| nput and Output Functions |
| Control Statements: Selection Statements - if, Nested if, if-else, Nested if-else, else-if ladder, switcl |
| Looping Statements - while, do-while, for, Nested loops, Unconditional Statements - goto, break |
| continue, return. |
| At the end of the Module 3, students will be able to: |
| 1. Explain the Formatted and Unformatted I/O functions. (BL - 2) |
| 2. Understand Selection Statements. (BL - 2) |
| 3. Understand Looping Statements. (BL - 2) |
| 4. Explain Unconditional Statements. (BL - 2) |
| MODULE-4 Functions and Program Structure 8 H |
| Functions: Introduction, Using Functions, Passing Arguments to a Function, Working with Functio |
| Scope and Extent, Recursion, The C Preprocessor. |
| Program Structure: Storage classes, Automatic variables, External variables, Static variables, Registe |
| variables, Multi file programs. |
| At the end of the Module 4, students will be able to: |
| 1. Understand the basic concept of functions. (BL - 2) |
| 2. Understand concept of Recursion and Preprocessor. (BL - 2) |
| 3. Explain storage specifiers. (BL - 2) |
| MODULE-5 Arrays and Pointers 9 H |
| |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulatio |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulatio String Manipulation, Arrays of Strings. |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulatio String Manipulation, Arrays of Strings. Pointers: Fundamentals, Pointer Declarations, Operations on pointers, Passing Pointers to a Functio |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulatio String Manipulation, Arrays of Strings. Pointers: Fundamentals, Pointer Declarations, Operations on pointers, Passing Pointers to a Functio Pointers and Arrays, Arrays of Pointers, Pointer to Pointer, Pointer to Functions, Command ling |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulation String Manipulation, Arrays of Strings. Pointers: Fundamentals, Pointer Declarations, Operations on pointers, Passing Pointers to a Function Pointers and Arrays, Arrays of Pointers, Pointer to Pointer, Pointer to Functions, Command lin arguments, Dynamic Memory Management. |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulatio String Manipulation, Arrays of Strings. Pointers: Fundamentals, Pointer Declarations, Operations on pointers, Passing Pointers to a Functio Pointers and Arrays, Arrays of Pointers, Pointer to Pointer, Pointer to Functions, Command ling |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulation String Manipulation, Arrays of Strings. Pointers: Fundamentals, Pointer Declarations, Operations on pointers, Passing Pointers to a Function Pointers and Arrays, Arrays of Pointers, Pointer to Pointer, Pointer to Functions, Command lin arguments, Dynamic Memory Management. |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulatio String Manipulation, Arrays of Strings. Pointers: Fundamentals, Pointer Declarations, Operations on pointers, Passing Pointers to a Functio Pointers and Arrays, Arrays of Pointers, Pointer to Pointer, Pointer to Functions, Command lin arguments, Dynamic Memory Management. At the end of the Module 5, students will be able to: Understand the concept of Arrays. (BL - 2) Understand the concept of pointers. (BL - 2) |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulatio String Manipulation, Arrays of Strings. Pointers: Fundamentals, Pointer Declarations, Operations on pointers, Passing Pointers to a Functio Pointers and Arrays, Arrays of Pointers, Pointer to Pointer, Pointer to Functions, Command lin arguments, Dynamic Memory Management. At the end of the Module 5, students will be able to: Understand the concept of Arrays. (BL - 2) Explain Dynamic Memory Management. (BL -2) |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulatio String Manipulation, Arrays of Strings. Pointers: Fundamentals, Pointer Declarations, Operations on pointers, Passing Pointers to a Functio Pointers and Arrays, Arrays of Pointers, Pointer to Pointer, Pointer to Functions, Command lin arguments, Dynamic Memory Management. At the end of the Module 5, students will be able to: Understand the concept of Arrays. (BL - 2) Understand the concept of pointers. (BL - 2) |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulatio String Manipulation, Arrays of Strings. Pointers: Fundamentals, Pointer Declarations, Operations on pointers, Passing Pointers to a Functio Pointers and Arrays, Arrays of Pointers, Pointer to Pointer, Pointer to Functions, Command lin arguments, Dynamic Memory Management. At the end of the Module 5, students will be able to: Understand the concept of Arrays. (BL - 2) Explain Dynamic Memory Management. (BL -2) |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulatio String Manipulation, Arrays of Strings.Pointers: Fundamentals, Pointer Declarations, Operations on pointers, Passing Pointers to a Functio Pointers and Arrays, Arrays of Pointers, Pointer to Pointer, Pointer to Functions, Command lin arguments, Dynamic Memory Management.At the end of the Module 5, students will be able to: 1. Understand the concept of Arrays. (BL - 2) 2. Understand the concept of pointers. (BL - 2) 3. Explain Dynamic Memory Management. (BL -2)MODULE-68 H |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulatio String Manipulation, Arrays of Strings. Pointers: Fundamentals, Pointer Declarations, Operations on pointers, Passing Pointers to a Functio Pointers and Arrays, Arrays of Pointers, Pointer to Pointer, Pointer to Functions, Command lin arguments, Dynamic Memory Management. At the end of the Module 5, students will be able to: 1. Understand the concept of Arrays. (BL - 2) 2. Understand the concept of pointers. (BL - 2) 3. Explain Dynamic Memory Management. (BL -2) MODULE-6 User-Defined Data Types and Files 8 H Structures and Unions: Basics of Structures, Nesting of Structures, Arrays of Structures, Structures, yealef. |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulatio String Manipulation, Arrays of Strings. Pointers: Fundamentals, Pointer Declarations, Operations on pointers, Passing Pointers to a Functio Pointers and Arrays, Arrays of Pointers, Pointer to Pointer, Pointer to Functions, Command lin arguments, Dynamic Memory Management. At the end of the Module 5, students will be able to: 1. Understand the concept of Arrays. (BL - 2) 2. Understand the concept of pointers. (BL - 2) 3. Explain Dynamic Memory Management. (BL - 2) MODULE-6 User-Defined Data Types and Files 8 H Structures and Unions: Basics of Structures, Nesting of Structures, Arrays of Structures, Structures, Structures, Structures, Introduction, Using Files in C, Working with Text Files, Random Accesses to Files of Records. |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulatio String Manipulation, Arrays of Strings. Pointers: Fundamentals, Pointer Declarations, Operations on pointers, Passing Pointers to a Functio Pointers and Arrays, Arrays of Pointers, Pointer to Pointer, Pointer to Functions, Command lin arguments, Dynamic Memory Management. At the end of the Module 5, students will be able to: 1. Understand the concept of Arrays. (BL - 2) 2. Understand the concept of pointers. (BL - 2) 3. Explain Dynamic Memory Management. (BL -2) MODULE-6 User-Defined Data Types and Files 8 H Structures and Unions: Basics of Structures, Nesting of Structures, Arrays of Structures, Structures, of Structures, Unions, Bit-fields, Enumeration ypedef. Files: Introduction, Using Files in C, Working with Text Files, Random Accesses to Files of Records. At the end of the Module 6, students will be able to: |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulatio String Manipulation, Arrays of Strings. Pointers: Fundamentals, Pointer Declarations, Operations on pointers, Passing Pointers to a Functio Pointers and Arrays, Arrays of Pointers, Pointer to Pointer, Pointer to Functions, Command lin arguments, Dynamic Memory Management. At the end of the Module 5, students will be able to: 1. Understand the concept of Arrays. (BL - 2) 2. Understand the concept of pointers. (BL - 2) 3. Explain Dynamic Memory Management. (BL -2) MODULE-6 User-Defined Data Types and Files 8 H Structures and Unions: Basics of Structures, Nesting of Structures, Arrays of Structures, Structures, or pointers, Structures, Structures, Structures, Introduction, Using Files in C, Working with Text Files, Random Accesses to Files of Records. At the end of the Module 6, students will be able to: 1. Introduction, Using Files in C, Working with Text Files, Random Accesses to Files of Records. At the end of the Module 6, students will be able to: 1. I. Explain user defined data types. (BL - 2) |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulatio String Manipulation, Arrays of Strings. Pointers: Fundamentals, Pointer Declarations, Operations on pointers, Passing Pointers to a Functio Pointers and Arrays, Arrays of Pointers, Pointer to Pointer, Pointer to Functions, Command lin arguments, Dynamic Memory Management. At the end of the Module 5, students will be able to: 1. Understand the concept of Arrays. (BL - 2) 2. Understand the concept of pointers. (BL - 2) 3. Explain Dynamic Memory Management. (BL -2) MODULE-6 User-Defined Data Types and Files 8 H Structures and Unions: Basics of Structures, Nesting of Structures, Arrays of Structures, Structures, Nesting of Structures, Unions, Bit-fields, Enumeration ypedef. Files: Introduction, Using Files in C, Working with Text Files, Random Accesses to Files of Records. At the end of the Module 6, students will be able to: 1. Explain user defined data types. (BL - 2) |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulatio String Manipulation, Arrays of Strings. Pointers: Fundamentals, Pointer Declarations, Operations on pointers, Passing Pointers to a Functio Pointers and Arrays, Arrays of Pointers, Pointer to Pointer, Pointer to Functions, Command lin arguments, Dynamic Memory Management. At the end of the Module 5, students will be able to: Understand the concept of Arrays. (BL - 2) Understand the concept of pointers, Nesting of Structures, Arrays of Structures, Structures and Unions: Basics of Structures, Nesting of Structures, Arrays of Structures, Structure and Functions, Self-Referential Structures, Unions, Bit-fields, Enumeration ypedef. Files: Introduction, Using Files in C, Working with Text Files, Random Accesses to Files of Records. At the end of the Module 6, students will be able to: Explain user defined data types. (BL - 2) Understand the concept of Self-Referential Structures, Unions, Bit-fields, Enumeration ypedef. |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulation String Manipulation, Arrays of Strings. Pointers: Fundamentals, Pointer Declarations, Operations on pointers, Passing Pointers to a Function Pointers: Fundamentals, Pointer Declarations, Operations on pointers, Passing Pointers to a Function Pointers: Arrays of Pointers, Pointer to Pointer, Pointer to Functions, Command linarguments, Dynamic Memory Management. At the end of the Module 5, students will be able to: 1. Understand the concept of Arrays. (BL - 2) 2. Understand the concept of pointers. (BL - 2) 3. Explain Dynamic Memory Management. (BL -2) MODULE-6 User-Defined Data Types and Files Structures and Unions: Basics of Structures, Nesting of Structures, Arrays of Structures, Structures and Functions, Self-Referential Structures, Unions, Bit-fields, Enumeration ypedef. Files: Introduction, Using Files in C, Working with Text Files, Random Accesses to Files of Records. At the end of the Module 6, students will be able to: 1. Explain user defined data types. (BL - 2) 2. Understand the concept of Self-Referential Structures. (BL - 2) 3. Understand the concept of Self-Referential Structures. (BL - 2) 3. |
| Arrays and Strings: Introduction, One-Dimensional Array, Multidimensional Arrays, Passing Array to Function, Strings - Declaration, Initialization, Printing Strings, String Input, Character Manipulatio String Manipulation, Arrays of Strings. Pointers: Fundamentals, Pointer Declarations, Operations on pointers, Passing Pointers to a Functio Pointers and Arrays, Arrays of Pointers, Pointer to Pointer, Pointer to Functions, Command lin arguments, Dynamic Memory Management. At the end of the Module 5, students will be able to: Understand the concept of Arrays. (BL - 2) Understand the concept of pointers, Nesting of Structures, Arrays of Structures, Structures and Unions: Basics of Structures, Nesting of Structures, Arrays of Structures, Structure and Functions, Self-Referential Structures, Unions, Bit-fields, Enumeration ypedef. Files: Introduction, Using Files in C, Working with Text Files, Random Accesses to Files of Records. At the end of the Module 6, students will be able to: Explain user defined data types. | COURSE CONTENT | CO |
|---|------|
| TASK-1 (3H) | |
| 1. Practice DOS and LINUX Commands necessary for execution of C Programs. | CO 1 |
| 2. Study of the Editors, Integrated development environments, and Compilers in | |
| chosen platform. | |
| 3. Write, Edit, Debug, Compile and Execute Sample C programs to understand the | |
| programming environment. | |
| TASK-2 (6H) | |
| 1. Practice programs: Finding the sum of three numbers, exchange of two numbers, | CO 1 |
| largest of two numbers, to find the size of data types, Programs on precedence and | |
| associativity of operators, sample programs on various library functions. | |
| TASK-3 (6H) | |
| 1. Write a C program to calculate the factorial of a given number | CO1 |
| 2. Fibonacci sequence is defined as follows: the first and second terms in the sequence | |
| are 0 & 1. Subsequent terms are found by adding the preceding two terms in the | |
| sequence. Write a C program to generate the first n terms of the sequence. | |
| 3. Write a program to find the roots of a Quadratic equation. | |
| TASK-4 (6H) | |
| 1. Write a program to generate the series of prime numbers in the given range. | CO 2 |
| 2. Write a program to reverse the digits of a number. | |
| 3. Write a C program to find the sum of individual digits of a positive integer. | |

| TASK-5 (3H) | |
|--|------|
| 1. Write a program to check for number palindrome. | CO 2 |
| 2. Write a program to find the maximum of a set of numbers. | 002 |
| 3. Write a C program to find the GCD (greatest common divisor) of two given integers | |
| TASK-6 (3H) | |
| 1. Write a program to find the sum of positive and negative numbers in a given set of numbers. | CO 3 |
| 2. Write C code to reverse the elements of the array. For example, [1,2,3,4,5] should | |
| become [5,4,3,2,1] | |
| 3. Write a C program to find factorial of a given integer number using recursion | |
| TASK-7 (6H) | |
| 1. Write a C program that use pointers to find Addition of Two Matrices | CO 3 |
| 2. Write a C program that use functions to find Multiplication of Two Matrices | |
| TASK-8 (3H) | |
| 1. Write a program to accept a line of characters and print the number of Vowels, | CO 3 |
| Consonants, blank spaces, digits and special characters. | |
| 2. Write a C program to check whether a given string is a palindrome or not, without using any built-in functions. | |
| TASK-9 (6H) | |
| 1. Illustrate the use of auto, static, register and external variables. | CO 4 |
| 2. Write a program to read and print student information using structures | |
| 3. Write a C program to define a union and structure both having exactly the same | |
| numbers using the size of operators print the size of structure variables as well as | |
| union variable | |
| TASK-10 (6H) | |
| Write a program to split a "file" into two files, say file1 and file2. Write lines into the 'file' from standard input. Read the contents from 'file' and write odd numbered lines into file1 and even numbered lines into file2. Write a program to merge two files. | CO 4 |
| 2. write a program to merge two mes. | |

| Additional Experiments: | |
|--|------|
| TASK-1 | |
| Programs on bitwise operators. Programs on bit fields. | CO4 |
| TASK-2 | |
| Write a program to read a set of strings and sort them in alphabetical order. Programs on implementation of structures using files. | CO 4 |

| Pre-requisite: Knowledge of Mathematics and Basic Programming Language | | | | | | | | | | | | | | | | |
| Course Objectives: To learn the fundamentals of python. To implement python programs for conditional loops and functions. To handle the compound data using python lists, tuples, sets, dictionaries. To learn the files, modules, packages concepts. To introduce the concepts of class and exception handling using python. To train in regular expression concepts. Course Outcomes: After successful completion of the course, the student will be able to: | | | | | | | | | | | | | | | | |
| CO 1 | Summarize th | e fundame | ntal concep | ots of pyth | on progran | nming. (BI | 2) | | | | | | | | | |
| CO 2 | Apply the basi | ic element | s and const | ructs the p | ython to so | olve logica | l problems | s. (BL - 3) | | | | | | | | |
| CO 3 | Organize data | using diff | erent data s | structures of | of python. | (BL - 3) | | | | | | | | | | |
| CO 4 | CO 4 Implement the files modules and packages in programming. (BL - 3) | | | | | | | | | | | | | | | |
| CO 5 | CO 5 Apply object oriented & exception handling concepts to build simple applications.(BL - 3) | | | | | | | | | | | | | | | |
| CO 6 | Implement the | e concepts | of Regular | expression | ns and Tur | tle Graphic | cs. (BL - 3 | CO 6 Implement the concepts of Regular expressions and Turtle Graphics. (BL - 3) | | | | | | | | |

| | COURSE CONTENT | |
|--------------------------|---|-------------------|
| MODULE – 1 | Introduction to Python | 7H |
| Introduction: Histor | y of Python, Features of Python Programming, Application | s of Python |
| | ng Python Scripts, Comments, Typed Language, Identifier | |
| | put, Indentation, Data types, Type Checking, range(), for | |
| module. | | |
| At the end of the Mo | dule 1, students will be able to: | |
| 1. Learn the ba | sics of python. (BL - 1) | |
| 2. Write the py | thon programs. (BL - 1) | |
| 3. Understand | command line arguments. (BL - 2) | |
| MODULE -2 | Operators Expressions and Functions | 8H |
| Operators and Exp | pressions: Operators: Arithmetic, Assignment, Relational, I | Logical, Boolean, |
| Bitwise, Membershi | p, Identity, Expressions and Order of Evaluations, Control S | tatements. |
| | ction, Defining Functions, Calling Functions, Anonymous | |
| | d Functions, Composition, lambda Function, Parameters | |
| 0 0 | , Types of Arguments-Positional Arguments, Keyword Ar | • |
| 0 | e Length Arguments, Scope of variables, Adding new Fur | ctions, Recursive |
| Functions. | | |
| | At the end of the Module 2, students will be able to: | |
| 1. Solve the pro- | oblems using operators, conditional and looping. (BL - 3) | |
| | oblems using the functions. (BL -3) | |
| | inciple of recursion to solve the problems. (BL-3) | |
| | | 011 |
| MODULE-3 | Strings, Lists, Tuples, Dictionaries and Sets | 9H |
| | les, Dictionaries and Sets: Strings- Operations, Slicing | |
| | Methods, Tuple- Operations, Methods, Sets- Operation | |
| - | tions, Methods, Mutable Vs Immutable, Arrays Vs List | s, Map, Reduce, |
| Filter, Comprehensie | | |
| | dule 3, students will be able to: ams for manipulating the strings. (BL - 1) | |
| | he knowledge of data structures like Tuples, Lists, Dictionaries and | d Sets (BL-2) |
| | priate data structure of Python for solving a problem.(BL -3) | |
| MODULE-4 | Files, Modules and Packages | <u>8</u> H |
| | d Packages: Files- Persistent, Text Files, Reading an | |
| , | ilename and Paths, Command Line Arguments, File me | 0 |
| - | mport Statement, Form Import Statement, name spacing | |
| | Installing Packages via PIP(Numpy, Pandas), Using Pyth | |
| | At the end of the Module 4, students will be able to: | ion i uenuges. |
| 1. Understand | the concepts of files. (BL - 2) | |
| | he modules and packages. (BL - 3) | |
| 3. Organize dat | ta in the form of files. (BL - 3) | |
| MODULE-5 | Object Oriented Programming, Errors and Exceptions | 8H |
| • | Object Oriented Features, Classes, self variable, Metho | |
| | nce, Overriding Methods, Data hiding, Polymorphism, Ope | rator Oveloading, |
| Abstract Classes. | | |
| - | ons: Difference between an error and Exception, Handlin | ng Exception, try |
| except block, Raising | g Exceptions, User Defined Exceptions. | |
| 1 4 1 1. | At the end of the Module 5, students will be able to: | |
| | et orientation concepts.(BL -3) | |
| 2. Apply the e | xception handling concepts. (BL -3) | |
| | | |

| 3. Implement OOPs using Python for solving real-world problems. (BL -3) | | | | | | | | |
|---|--|----|--|--|--|--|--|--|
| MODULE-6 | Regular Expressions and Turtle Graphics | 8H | | | | | | |

Regular Expressions: Introduction, Sequence Characters in Regular Expressions, Quantifiers in Regular Expressions, Special Characters in Regular Expressions, Using Regular Expressions on Files, Retrieving Information from a HTML File, Pattern finding programs using regular expression.

Turtle Graphics: Move and Draw, Turtle Operations, Turtle object, Simple Graphics, The Vagrant, The Beautiful Patterns, Drawing with Colors.

At the end of the Module 6, students will be able to:

- 4. Describe the concepts of Regular Expressions. (BL -2)
- 5. Write the regular expression applications using Python. (BL -1)
- 6. Develop GUI applications using Python. (BL -3)

Total hours:48 HOURS

Content Beyond Syllabus:

- 4. Testing
- 5. GUI Programming
- 6. Matplotlib
- 7. Databases

Text Book(s):

- 1. Vamsi Kurama, Python Programming: A Modern Approach, Pearson, 2017.

| COURSE CONTENT | CO |
|--|------|
| Task-1 - Python Basics (4 H) | |
| 1. Running instructions in Interactive interpreter and a Python Script | CO 1 |
| 2. Write a program to purposefully raise Indentation Error and Correct it | |
| 3. Write a program to compute distance between two points taking input from the | |
| user | |
| (Pythagorean Theorem) | |
| 4. Write a program to convert a Binary number to Decimal number and verify if it is | |
| a Perfect number. | |
| Task-2 - Conditional Statements (2 H) | |
| 1. Write a program to determine if a given string is a Palindrome or not | CO 1 |
| 2. Write a program for Fibonacci sequence is generated by adding the previous two | |
| terms by starting with 1 and 2, the first 10 terms will be: 1, 2, 3, 5, 8, 13, 21, 34, | |
| 55, 89, | |
| Task-3 - Functions (2 H) | |
| 1. Write a function ball_collide that takes two balls as parameters and computes if | CO 2 |
| they are colliding. Your function should return a Boolean representing whether or not | |
| the balls are colliding. | |
| Hint: Represent a ball on a plane as a tuple of (x, y, r) , r being the radius. If (distance | |

| between two balls centers) <= (sum of their radii) then (they are colliding) | |
|--|------|
| | |
| TASK-4 - Functions Continued (2 H) | |
| 1. Write a function that draws a Pyramid with # symbols | CO 2 |
| | |
| # | |
| # # # # # # # # # | |
| # # # # # # | |
| 2. Choose any five built-in string functions of C language. Implement them on your own in Python. You should not use string related Python built-in functions. | |
| TASK-5 - Strings (4 H) | |
| 1. Write a program to use split and join methods in the string and trace a birthday | CO 2 |
| with | |
| Diction b array data structure. | |
| 2. Write a program using map, filter and reduce functions | |
| TASK-6 - Lists (4 H) | |
| | CO |
| 1. Write program which performs the following operations on list's. Don't use built- in | CO 2 |
| functions | |
| a) Updating elements of a list | |
| b) Concatenation of list's | |
| c) Check for member in the list | |
| d) Insert into the list | |
| e) Sum the elements of the list | |
| f) Push and pop element of list | |
| g) Sorting of list | |
| | |
| h) Finding biggest and smallest elements in the listi) Finding common elements in the list | |
| TASK-7 - Files (2 H) | |
| | COS |
| 1. Write a program to print each line of a file and count the number of characters, words and lines in a file. | το. |
| 2. Write a program that allows you to replace words, insert words and delete words | |
| from the file. | |
| TASK-8 - Modules and Packages (2 H) | |
| 1. Write a program for creating a module and import a module | CO 3 |
| 2. Write a program to perform any two operations using Numpy and pandas | |
| TASK-9 - Class and Objects (4 H) | |
| 1. Write a program for Class variables and instance variable and illustration of the self | CO 4 |
| variable | |
| i) Robot | |
| i) ATM Machine | |
| TASK-10 - Exception Handling (2 H) | |
| 1. Write a program of exception handling to open a file while do not have write permissions | CO 4 |

| 2. Write a Program to handle multiple errors with one except statement. | |
|--|------|
| TASK-11 - Regular Expressions (2 H) | |
| 1. Write a Python program to remove the parenthesis area in a string. | CO 3 |
| Sample data : ["example (.com)", "w3resource", "github (.com)", "stackoverflow | |
| (.com)"] | |
| 2. Write a program to match the name phone , emails, passwords and phone numbers | |
| using pattern matching | |
| TASK-12 - Turtle (2 H) | |
| 1. Write a turtle program to construct a clock dial | CO 3 |
| 2. Write a turtle program to produce a flower in different colours | |

| TASK-1 1. Write a python program to find the resolution of an image 2. Write a python program to count the number of vowels and consonants 3. Write a python program to print the ASCII value of a character Virtual Labs: Python Lab (IIT Bombay) : http://vlabs.iitb.ac.in/vlabs-dev/labs/python-basics/experimentlist.html | Additional Experiments: | |
|--|--|--|
| 2. Write a python program to count the number of vowels and consonants 3. Write a python program to print the ASCII value of a character Virtual Labs: Python Lab (IIT Bombay) : http://vlabs.iitb.ac.in/vlabs-dev/labs/python- | TASK-1 | |
| 3. Write a python program to print the ASCII value of a character Virtual Labs: Python Lab (IIT Bombay) : http://vlabs.iitb.ac.in/vlabs-dev/labs/python- | 1. Write a python program to find the resolution of an image | |
| Virtual Labs: Python Lab (IIT Bombay) : http://vlabs.iitb.ac.in/vlabs-dev/labs/python- | 2. Write a python program to count the number of vowels and consonants | |

PART-B IT WORKSHOP LAB

Course Objectives:

- 1. To provide Technical training on Productivity tools like Word processors, Spreadsheets, Presentations.
- 2. To make the students know about the internal parts of a computer, assembling, installing the operating system.
- 3. To teach connecting two or more computers.

| Course | Course Outcomes: After successful completion of the course, the student will be able to: | | | | | | | |
|--------|--|--------|--|--|--|--|--|--|
| CO 1 | CO 1 Understand functionalities of a computer and operating system. (BL-2) | | | | | | | |
| CO 2 | Practice Word processors, Presentation and Spreadsheet tool. | (BL-2) | | | | | | |
| CO 3 | Connect computer using wired and wireless connections. | (BL-2) | | | | | | |

| COURSE CONTENT | CO |
|---|------|
| Task-1 Learn about Computer (4H) | |
| Identify the internal parts of a computer and its peripherals. Represent the same in the form of diagrams including Block diagram of a computer. Write specifications for each part of a computer including peripherals and specification of Desktop computer. Submit it in the form of a report. | CO 1 |
| Task -2 Assembling a Computer (4H) | |
| Disassemble and assemble the PC back to working condition. Troubleshoot the computer and identify working and non-working parts. Identify the problem correctly by various methods available (eg: beeps). Record the process of assembling and trouble-shooting a computer. | CO 1 |
| Task-3 Install Operating system (2H) | CO 1 |
| Install Linux, any other operating system (including proprietary software) and make the system dual boot or multi boot. Record the entire installation process. | |
| TASK-4 Operating system features (2H) | CO 1 |
| Record various features that are supported by the operating system(s) installed. Submit a report on it. Access CD/DVD drives, write CD/DVDs, access pen drives, print files, etc. Install new application software and record the installation process. | |
| TASK-5 Word Processor (6H) | CO 2 |
| Create documents using the word processor tool. Tasks to be performed are inserting and deleting the characters, words and lines, Alignment of the lines, Inserting header and Footer, changing the font, changing the colour, including images and tables in the word file, making page setup, copy and paste block of text, images, tables, linking the images which are present in other directory, formatting paragraphs, spell checking, etc. Prepare project cover pages, content sheet and chapter pages at the end of the task using the features studied. Submit a report of the word processor considered. Create documents using the word processor tool. Mail Merge in word processor for creating appointment orders for 10 employee records in excel. | |
| TASK-6 Spreadsheet (4H) | CO 2 |
| To create, open, save the spreadsheet and format them as per the requirement. Some of the tasks to be practiced are Managing the worksheet environment, creating cell data, inserting and deleting cell data, format cells, adjust the cell size, applying formulas and functions, preparing charts, sorting cells, working with pivot tables and charts. Submit a report of the Spreadsheet application considered. | |
| TASK-7 Presentations (6H) | CO 2 |
| To create, open, save and run the presentations, Select the style for slides, format the slides with different fonts, colors, create charts and tables, insert and delete text, graphics and animations, bulleting and numbering, hyperlink, set the time for slide show, Record slide show. Submit a report of the Presentation tool considered. | |
| TASK-8 Wired network & Wireless network (4H) | CO 3 |
| Select a LAN cable, Identify the wires in the cable, Define the purpose of each wire, Study the RJ45 connecter, Use crimping tool to fix the cable to the connecter, Test the cable using LAN tester, Connect two or more computers using cross and straight cables, Configure the computers, share the data between the computers. | |

| Additional Experiments: | |
|---|------|
| TASK -1 IoT | CO 3 |
| Raspberry Pi Study the architecture of Raspberry pi, configure software, Install SD card, Connect the cables, Install Raspbian (or any other) operating system, Configure Wi-Fi, remotely connect to your Raspberry Pi. | |
| TASK -2 OUTLOOK, MACROS | CO 3 |
| Practice the following tasks and submit report | |
| A. Configure outlook and access mails. | |
| B. Create Macros in word and spreadsheet tools | |
| | |
| | • |

Text Book(s):

1. B. Govindarajulu, "IBM PC and Clones Hardware Trouble shooting and Maintenance",2nd edition, Tata McGraw-Hill, 2002

2. "MOS study guide for word, Excel, Power point & Outlook Exams", Joan Lambert, Joyce Cox, PHI.

3. "Introduction to Information Technology", ITL Education Solutions limited, Pearson Education.

Reference Book(s):

1. Rusen, "Networking your computers and devices", PHI

2. Bigelows, "Trouble shooting, Maintaining & Repairing PCs", TMH.

COURSE CONTENT

| MODULE – 1 | 9H | | | | | | | | |
|--|---|--------------------|--|--|--|--|--|--|--|
| Introduction: Ov | verview of Data Structures, Implementation of Data | ctures, Algorithm | | | | | | | |
| Specifications, Ar | alysis of an Algorithm, Asymptotic Notations, Time-Space | trade off, Arrays. | | | | | | | |
| Searching: Introduction, Basic Terminology, Linear Search and Binary Search Techniques and their | | | | | | | | | |
| complexities. | | | | | | | | | |

At the end of the Module 1, students will be able to:

- 1. Understand the linear and non-linear data structures. (BL 2)
- 2. Understand the time and space complexities of an algorithm. (BL 2)
- 3. Illustrate representation of data using Arrays. (BL 2)

| 4. Explain sea | rching techniques. (BL - 2) | |
|----------------------|--|---------------------|
| MODULE -2 | Stacks and Queues | 9Н |
| Stacks: Introduction | on, Representation of a Stack, Stack Operations, Applications of S | Stacks. |
| | ion, Representation of a Queue, Queue Operations, Various | |
| - | ouble Ended Queue, Priority Queue, Applications of Queues. | |
| | Adule 2, students will be able to: | |
| | ck ADT and its operations. (BL - 2) | |
| - | the expression evaluation using stacks. (BL - 2) | |
| | various queue structures. (BL - 3) | |
| MODULE-3 | Linked Lists and Sorting | 10H |
| Introduction, Sing | y linked lists, Doubly Linked Lists, Circular Linked Lists, L | inked Stacks and |
| Queues, Applicatio | ns of Linked Lists. | |
| | ion, Bubble Sort, Selection Sort, Insertion Sort, Merge Sort, Qui | ck Sort |
| | Adule 3, students will be able to: | |
| 1. Understand | basics concepts of linked lists. (BL - 2) | |
| | rious structures of linked lists. (BL - 2) | |
| 3. Understand | the concept of sorting. (BL - 2) | |
| MODULE-4 | Trees | 10H |
| Introduction, Ba | sic Terminologies, Definition and concepts, Representation | of Binary Tree, |
| | inaryTree, Binary Search Tree, Height balanced BinaryTree, | - |
| At the end of the N | Adule 4, students will be able to: | |
| | the concept of trees. (BL - 2) | |
| | fferent tree structures. (BL - 2) | |
| - | for indexing. (BL - 3) | |
| MODULE-5 | Graphs& Hashing | 10H |
| Graphs: Introduct | ion, Graph Terminologies, Representation of Graphs, Graph Op | perations. Shortest |
| - | Sorting, Minimum Spanning Trees – Kruskal's and Prim's alg | |
| | n Table, Static Hashing, Dynamic Hashing. | |
| | Adule 5, students will be able to: | |
| | importance of Graphs for solving problems. (BL - 2) | |
| 2. Understand | graph traversal methods. (BL - 2) | |
| | algorithms to identify shortest path. (BL - 3) | |
| 1 | Total hours: | 48 hours |
| Content beyond s | vllabus: | |

| COURSE CONTENT | | | | | | | | |
|--|--|------------------|--|--|--|--|--|--|
| MODULE – 1 | Introduction of computer architecture | 10H | | | | | | |
| Basic Structure of Computer: Computer Types, Functional Units, Basic operational Concepts, Bus Structure, Performance, Multiprocessors and Multicomputer, Numbers, Arithmetic Operations and Programs, Instructions and Instruction Sequencing, Addressing Modes, Basic Input/output Operations, Stacks and Queues, Subroutines. | | | | | | | | |
| Illustrate the computer sy Compare Main 3. Explain add | Module 1, students will be able to: basic functional units and different ways of interconnecting to stem. (BL 2). ultiprocessors and Multicomputer. (BL 2). ressing modes for accessing register and memory operands.(B /output Operations. (BL 1). | | | | | | | |
| MODULE – 2 | Data representation and computer Arithmetic | 9Н | | | | | | |
| Fixed point representation of numbers: Algorithms for arithmetic operations, multiplication: Booths, Modified Booths, division: restoring and non-restoring. Floating point representation: IEEE standards and algorithms for common arithmetic operations, Representation of character codes. | | | | | | | | |
| Explain fixe Make use of | Module 2, students will be able to: d point and floating point representation of numbers. (BL 2). TEEE standards to perform operations on floating point numbers algorithm to multiply two signed numbers. (BL 3). | oers. (BL 3). | | | | | | |
| MODULE-3 | Concepts of Computer Architecture | 9H | | | | | | |
| Types of operands, Unit: Fundamental | SA (Instruction Set Architecture): Machine Instruction Instruction formats, Instruction types and addressing modes. Concepts, Execution of a Complete Instruction, Multiple B Micro programmed Control. | Basic Processing | | | | | | |
| Discuss the Explain Inst Define the c | At the end of the Module 3, students will be able to: 1. Discuss the Machine Instruction Characteristics. (BL 2). 2. Explain Instruction types and addressing modes. (BL 2). 3. Define the concept of Multiple Bus Organization (BL 1). | | | | | | | |
| MODULE-4 | Memory Organization | 10H | | | | | | |
| Basic concepts, Semiconductor RAM memories, Read only memories, speed, size and cost, Cache memories, performance considerations, Virtual memory, Memory management requirements, Secondary storage .Forms of Parallel Processing, Array Processors, The Structure of General-Purpose multiprocessors, Interconnection Networks, Data &Instruction Hazards. | | | | | | | | |
| At the end of the Module 4, students will be able to: 1. Recognize the various types of memories. (BL 1). 2. Understand the concept of memory organization. (BL 2). | | | | | | | | |

- 3. Explain the concept of Multiple Bus Organization. (BL 2).
- 4. Compare the performance of cache memory and virtual memory. (BL 2).
- 5. Understand the Interconnection Networks structure and hazards of the system (BL2).

| MODULE-5 | Input/Output Organization | 10H |
|----------|----------------------------------|------------|
|----------|----------------------------------|------------|

I/O Basics: Accessing I/O Devices, Interrupts: Interrupt Hardware, Enabling and Disabling Interrupts, Handling Multiple Devices, Direct Memory Access (DMA).**Buses:** Synchronous Bus, Asynchronous Bus, Interface Circuits, Standard I/O Interface, Peripheral Component Interconnect (PCI) Bus, Universal Serial Bus (USB).

At the end of the Module 5, students will be able to:

- 1. Understand I/O Devices and buses. (BL 2).
- 2. Make use of interrupt handling mechanisms for various processors. (BL 3).
- 3. Describe the concept of DMA. (BL 2).
- 4. Understand Interface Circuits and Standard I/O Interface. (BL 2).

Total Hours

48H

Content beyond syllabus:

- 1. Signed magnitude numbers addition on various numbers.
- 2. PLA control.

| MODULE – 2 Relational Model, Relational Algebra | | | | | | | | | | 011 | | | | |

Introduction to the Relational Model – Integrity Constraints over Relations, Enforcing Integrity constraints, querying relational data, Logical data base Design, Views. Introduction to Relational algebra, selection and projection, set operations, renaming, joins, division.

At the end of the Module 2, students will be able to:

- 1. Understand Basics of Relational Model. (BL-2)
- 2. Describe phases of Logical Database Design.(BL-2)
- 3. Explain the relational algebra operations on relations. (BL-2)

| MODULE – 3 | SQL | 8H |
|------------|-----|----|
|------------|-----|----|

SQL: Basic form of SQL Query, DDL, DML, Views in SQL, Joins, Nested & Correlated queries, Operators, Aggregate Functions, integrity and security, Functions & Procedures, Packages, Triggers, Cursors, PL/SQL principles and examples.

At the end of the Module 3, students will be able to:

- 1. Construct SQL queries in RDBMS. (BL-3)
- 2. Understand integrity and security Constraints in SQL (BL-2)
- 3. Construct PL/SQL programs in RDBMS. (BL-3)

| MODULE – 4 | Normalization & Transaction Management | 12H |
|-----------------|--|----------|
| Introduction Fu | nctional Dependencies (EDs) Normalization for relational datab | ases 1NF |

Introduction, Functional Dependencies (FDs), Normalization for relational databases: 1NF, 2NF,3NF and BCNF, Basic definitions of Multi Valued Dependencies, 4NF and 5NF.Transaction processing, Transaction Concept, Transaction State, Implementation of Atomicity and Durability, Concurrent Executions.

At the end of the Module 4, students will be able to:

- 1. Analyze functional dependencies. (BL-3)
- 2. Apply normal forms on functional dependencies. (BL-3)
- 3. Understand Atomicity and Durability, Concurrent Executions. (BL-2)

MODULE - 5Concurrency Control & Recovery and Indexing12HLock-Based Protocols, Timestamp- Based Protocols, Validation-Based Protocols, MultipleGranularity. Failure Classification, Recovery and Atomicity, Log-Based Recovery.

Introduction to Index data structures, Hash-Based, Tree Based Indexing.

At the end of the Module 5, students will be able to:

- 1. Discuss the Concurrency Control and various Protocols. (BL-2)
- 2. Understand reasons for system failures. (BL-2)
- 3. Understand Ordered Indices, B+ Tree Index Files. (BL-2)

Total hours: 48 Hours

Content beyond syllabus:

- 1. Embedded SQL
- 2. Client/Server Database environment
- 3. Web Database environment

Text Book(s):

1. Abraham Silberschatz, Henry F. Korth, S. Sudarshan, Database System Concepts, 6th Edition, Tata McGraw-Hill Publishing Company,2017.

STATEMENTS AND PREDICATE CALCULUS

10 Hrs

Statements and notations, connectives, well-formed formulas, truth tables, tautology, Equivalence implication; Normal forms: Disjunctive normal forms, Conjunctive normal forms, Principle Disjunctive normal forms, Principle Conjunctive normal forms .Predicative logic, Free & Bound variables, Rules of inference, Consistency, proof of contradiction, Automatic Theorem Proving.

At the end of this Module students will be able:

1. To understand the concepts associated with Mathematical Logic and Predicate calculus.

MODULE- II

MODULE – I

SET THEORY

11Hrs

Properties of binary relations, equivalence, compatibility and partial ordering relations, lattices. Hasse diagram. Inverse function, composition of functions, recursive functions. Lattices as partially ordered sets; Definition and examples, properties of lattices. Algebraic systems, Examples and general properties, Semi groups and Monoids, groups, and sub groups, Homomorphism, Isomorphism.

At the end of this Module students will be able:

- 1. To learn the basic concepts about relations, functions and to draw different diagrams like Lattice, Hasse diagrams.
- 2. To understand the concepts of Algebraic Structures and combinatorics.

MODULE- III ELEMENTARY COMBINATORICS

9 Hrs

Basics of counting, Permutations and Combinations, permutations and combinations with repetitions, the binomial theorem, multinomial theorem, generalized Inclusion-Exclusion principle, Pigeon-hole principle and its applications.

At the end of this Module students will be able:

1. To understand the Elementary Combinatorics and Pigeon-hole principle.

MODULE- IVGENERATING FUNCTIONS & RECURRENCE RELATIONS9 Hrs

Function of Sequences, Calculating Coefficients of generating functions. Recurrence relations, Solving recurrence relation by substitution and Generating functions, the method of Characteristic roots, solution of Inhomogeneous Recurrence Relations. At the end of this Module students will be able:

1. To describe various types of recurrence relations and the methods to find out their solutions.

MODULE-V

GRAPH THEORY

10 Hrs

Basic concepts of graphs, isomorphic graphs, Euler graphs, Hamiltonian graphs, planar graphs, graph coloring, digraphs, directed acyclic graphs, weighted graphs, Chromatic numbers. Trees, BFS, DFS, Spanning trees, Minimal spanning trees.

At the end of this Module students will be able:

1. To understand the basic concepts associated with Graphs and Trees.

Total hours: 49 Hours

Content beyond syllabus:

Finding Minimal cost Spanning Tree using Prim's Algorithm.

Text Book(s):

- 1. Discrete Mathematical Structures with Applications to Computer Science, J.P.Tremblay, R.Manohar, Mc.Grahill, 2001.
- 2. Discrete Mathematics and its Applications, Kenneth H.Rosen, 6th edition, TMH.
- 3. Mathematical Foundations of Computer Science, P.Chandrasekharaiah, Prism publications.

- 1. Discrete Mathematics for Computer Scientists & Mathematicians, second edition, J.L.Mott, A. Kandel, T.P. Baker, PHI
- 2. Discrete Mathematical Structures, Mallik and Sen, Cengage Learning.
- 3. Discrete Mathematical Structures, BernandKolman, Robert C. Busby, Sharon Cutler Ross, PHI/ Pearson Education.

| | COURSE CONTENT | | | | | | | |
|--|--|----|--|--|--|--|--|--|
| MODULE – 1 | Basic concepts of java | 9H | | | | | | |
| The History and Evolution of java: History of java, The java Buzz words, The Evolution of java, Lexical issues. Data types, variables: Data types, Variables, The Scope and Life time of variables, Operators, Expressions, Control statements, Type conversion and casting, Command Line Arguments. | | | | | | | | |
| Explain the i Identify varies | y i y v y | | | | | | | |
| MODULE -2 | Arrays and Strings | 9H | | | | | | |
| Declaration, Initialization and accessing values, One-Dimensional Arrays, Multi- dimensional arrays, Alternative Array Declaration Syntax, var-arg methods, Wrapper Classes. String, StringBuffer and StringBuilder classes. | | | | | | | | |
| 1. Understand | odule 2, students will be able to: Arrays and accessing array values.(BL-2) | | | | | | | |

2. Demonstrate 1-D and Multi-dimensional arrays.(BL-2)

| 3. Explain the S | String, StringBuffer, StringBuilder Classes.(BL-2) | | | | | | |
|--------------------------|--|--------------|--|--|--|--|--|
| - | | | | | | | |
| MODULE-3 | OOPs Concepts | 10H | | | | | |
| | . Declaration objects, Assigning object reference variables, | | | | | | |
| | tors, this keyword, Garbage collection, Inheritance basic | - | | | | | |
| | ts, Member access rules, Constructor and calling sequen | • • | | | | | |
| | final keywords. Method overloading and overriding, | | | | | | |
| interface, Implemen | ting interface, Accessing interface properties. | | | | | | |
| At the end of the Me | odule 3, students will be able to: | | | | | | |
| 1. Understand t | he basic syntax for class fundamentals.(BL-2) | | | | | | |
| - | ess modifiers in Inheritance.(BL-2) | | | | | | |
| - | l Contrast Method overloading and Method overriding.(BL-3 | 3) | | | | | |
| - | face and its implementation.(BL-2) | | | | | | |
| MODULE-4 | Packages, Exception Handling and Applets | 10H | | | | | |
| Packages: Defining | Package, finding packages and class path, accessing Protect | ion. | | | | | |
| Exception Handlin | ng: Exception handling Fundamentals, exception typ | es, Built-in | | | | | |
| Exceptions, Using the | ry-catch-finally throw- throws keywords, creating your own | Exceptions. | | | | | |
| Applets: Introduction | Applets: Introduction to Applets, Applet Life Cycle methods. | | | | | | |
| At the end of the Me | odule 4, students will be able to: | | | | | | |
| 1. Develop user | defined packages.(BL-3) | | | | | | |
| 2. Implement E | xception Handling.(BL-3) | | | | | | |
| - | n Exceptions (BL-1) | | | | | | |
| | pplet Life Cycle Methods. (BL-3) | | | | | | |
| MODULE-5 | Multi-Threaded Programming and Files | 10H | | | | | |
| Multi-Threaded Pro | ogramming: The java thread model, Thread Life Cycle, | The main() | | | | | |
| | Thread, Creating Multiple Threads, Using isalive() and jo | | | | | | |
| | nization. I/O Files: Byte Oriented and Character orier | | | | | | |
| RandomAccess File | | | | | | | |
| At the end of the Me | odule 5, students will be able to: | | | | | | |
| 1. Explain the c | concept of multi threaded concept.(BL-2) | | | | | | |
| 2. Discuss three | ad states and its priorities.(BL-3) | | | | | | |
| 3. Understand the | he concept of Synchronization.(BL-2) | | | | | | |
| 4. Demonstrate | input/output Files.(BL-3) | | | | | | |
| | Total hours | : 48 Hours | | | | | |

| COURSE CONTENT | CO | | | | |
|--|---------------|--|--|--|--|
| TASK-1 | (3H) | | | | |
| 1. Write a Program to Implement the following Searching Algorithms: | | | | | |
| a) Linear Search b) Binary Search | | | | | |
| TASK-2 | (6H) | | | | |
| Implement the following using arrays: A. Write a Program to Implement Stack Operations B. Write a Program to convert a given infix expression into its Postfix using stack. C. Write a Program to evaluate the Postfix Expression using stack | | | | | |
| TASK-3 | (3H) | | | | |
| Write a Program to Implement Queue Operations using Arrays Write a Program to Implement Circular Queue Operations using Arrays | | | | | |
| TASK-4 | | | | | |
| Write a Program to implement the operations of Singly Linked List Write a Program to implement the operations of Doubly Linked List | CO2 | | | | |

| TASK-5 | (6H) | | | | | |
|--|---------------|--|--|--|--|--|
| 1. Write a Program to implement stack operations using linked list | CO3 | | | | | |
| 2. Write a Program to implement the operations of Circular Singly Linked List | | | | | | |
| TASK-6 | (3H) | | | | | |
| 1. Write a Program to Sort the set of elements: | | | | | | |
| a) Insertion Sortb) Quick Sort | | | | | | |
| TASK-7 | | | | | | |
| Write a Program to Sort the set of elements: | C04 | | | | | |
| a) Merge Sort b) Heap Sort | | | | | | |
| TASK-8 | (6H) | | | | | |
| 1. Write a Program to implement the following on trees | CO3 | | | | | |
| a) Insertion and deletion operations | | | | | | |
| b) Traversals | | | | | | |
| 2. Write a Program to implement Binary Search Tree Operations. | | | | | | |
| TASK-9 | (6H) | | | | | |
| 1. Write a Program to implement the following Graph Traversal | CO4 | | | | | |
| Algorithms: | | | | | | |
| a) Depth first traversal b) Breadth first traversal | | | | | | |
| TASK-10 | (6H) | | | | | |
| 1. Write a Program to implement the following Minimum Spanning Tree Algorithms: | CO4 | | | | | |
| a) Kruskal's Algorithm b) Prim's Algorithm | | | | | | |

| Additional Experiments: | |
|--|-----|
| TASK-1 | |
| Write Program to Implement Fibonacci Search Write a Program to Implement Double Ended Queue Operations by using Array | CO4 |
| TASK-2 | |
| Write a Program to Implement Tree traversal Techniques Write a Program to Implement Radix Sort | CO4 |

| Virtual Labs: | | | | | | | |

| | COURSE CONTENT | СО |
|---------------|--|------|
| | Task - 1 BASIC CONCEPTS (3H) | |
| 1. Create a t | able called Employee with the following structure. | CO 1 |
| Name | Туре | |
| Empno | Number | |
| Ename | Varchar2(20) | |
| Job | Varchar2(20) | |
| Mgr | Number | |
| Sal | Number | |
| a. Add a co | lumn commission with domain to the Employee table. | |
| b. Insert an | y five records into the table. | |
| c. Update tl | he column details of job | |
| d. Rename | the column of Employ table using alter command. | |
| | e employee whose empno is19. | |
| | | |
| 2. Create de | partment table with the following structure. | |
| Name | Туре | |
| Deptno | Number | |
| - | Varchar2(20) | |
| location | Varchar2(20) | |
| | umn designation to the department table. | |
| | lues into the table. | |
| | ecords of emp table grouped by dept no. | |
| | he record where dept no is 9. | |
| - | ny column data from the table | |
| | | |
| 3. Create a | table called Customer table | |
| Name | Туре | |
| Custname | Varchar2(20) | |
| Custstreet | Varchar2(20) | |
| Cust city | Varchar2(20) | |
| | | |
| a. Insert rec | cords into the table. | |
| | ry column to the table. | |
| | table column domain. | |
| | ary column of the customer table. | |
| - | e rows of customer table whose Cust_city is 'hyd'. | |
| | table called branch table. | |
| | | |
| Name | Туре | |
| | ne Varchar2(20) | |
| | ity Varchar2(20) | |
| asserts | Number | |

| 4. Increase | e the size of data type for asserts to the branch. | |
|--------------|--|------|
| | d drop a column to the branch table. | |
| | alues to the table. | |
| | the branch name column | |
| _ | any two columns from the table | |
| | | |
| 5. Create | a table called sailor table | |
| Name | Туре | |
| Sid | Number | |
| Sname | Varchar2(20) | |
| rating | Varchar2(20) | |
| | | |
| a. Add col | lumn age to the sailor table. | |
| b. Insert v | alues into the sailor table. | |
| c. Delete t | he row with rating>8. | |
| d. Update | the column details of sailor. | |
| e. Insert n | ull values into the table. | |
| 6 Create | a table called reserves table | |
| Name | | |
| Boatid | Type Integer | |
| sid | Integer | |
| | - | |
| day | Integer | |
| a. Insert v | alues into the reserves table. | |
| b. Add co | lumn time to the reserves table. | |
| c. Alter th | e column day data type to date. | |
| d. Drop th | e column time in the table. | |
| e. Delete t | he row of the table with some condition. | |
| | Task 2 - QUERIES USING DDL AND DML(6H) | |
| 1. a. Creat | e a user and grant all permissions to the user. | CO 1 |
| b. Insert tl | ne any three records in the employee table and use rollback. Check the | |
| result. | | |
| c. Add pri | mary key constraint and not null constraint to the employee table. | |
| d. Insert n | ull values to the employee table and verify the result. | |
| | | |
| 2. a. Creat | e a user and grant all permissions to the user. | |
| b. Insert v | alues in the department table and use commit. | |
| . Add const | raints like unique and not null to the department table. | |
| . Insert rep | eated values and null values into the table. | |
| 2 o Crost | a a user and grant all normissions to the user | |
| | e a user and grant all permissions to the user. | |
| D. Insert V | alues into the table and use commit. | |

| c. Delete any three records in the department table and use rollback. | |
|--|-----|
| . Add constraint primary key and foreign key to the table. | |
| | |
| 4. a. Create a user and grant all permissions to the user. | |
| b. Insert records in the sailor table and use commit. | |
| c. Add save point after insertion of records and verify save point. | |
| d. Add constraints not null and primary key to the sailor table. | |
| 1 5 5 | |
| 5. a. Create a user and grant all permissions to the user. | |
| b. Use revoke command to remove user permissions. | |
| c. Change password of the user created. | |
| d. Add constraint foreign key and notnull. | |
| d. Add constraint foreign key and notifuli. | |
| 6. a. Create a user and grant all permissions to the user. | |
| b. Update the table reserves and use save point and rollback. | |
| c. Add constraint primary key, foreign key and not null to the reserves table | |
| . Delete constraint not null to the table column | |
| Task -3QUERIES USING AGGREGATE FUNCTIONS(3H) | |
| 1. a. By using the group by clause, display the names who belongs to dept no 10 | CO2 |
| along with average salary. | 001 |
| b. Display lowest paid employee details under each department. | |
| c. Display number of employees working in each department and their | |
| | |
| department number. | |
| d. Using built in functions, display number of employees working in each | |
| department and their department name from dept table. Insert dept name to dept | |
| table and insert dept name for each row, do the required thing specified above. | |
| e. List all employees which start with either B or C. | |
| f. Display only these ename of employees where the maximum salary is greater | |
| than or equal to 5000. | |
| | |
| 2. a. Calculate the average salary for each different job. | |
| b. Show the average salary of each job excluding manager. | |
| c. Show the average salary for all departments employing more than three people. | |
| d. Display employees who earn more than thelowest salary in department 30 | |
| e. Show that value returned by sign (n)function. | |
| f. How many days between day of birth to current date | |
| | |
| 3. a. Show that two substring as single string. | |
| b. List all employee names, salary and 15% rise in salary. | |
| c. Display lowest paid emp details under each manager | |
| d. Display the average monthly salary bill for each deptno. | |
| e. Show the average salary for all departments employing more than two people. | |
| f. By using the group by clause, display the eid who belongs to dept no 05 along | |
| with average salary. | |
| willi avoiage salaly. | |

| 4. a. Count the number of employees in department20 | |
|---|----------|
| b. Find the minimum salary earned by clerk. | |
| c. Find minimum, maximum, average salary of all employees. | |
| d. List the minimum and maximum salaries for each job type. | |
| e. List the employee names in descending order. | |
| f. List the employee id, names in ascending order by empid. | |
| 1. List the employee it, names in useenamy order by emplo. | |
| 5. a. Find the sids, names of sailors who have reserved all boats called | |
| "INTERLAKE | |
| Find the age of youngest sailor who is eligible to vote for each rating level with at | |
| least two such sailors. | |
| b. Find the sname, bid and reservation date for each reservation. | |
| c. Find the ages of sailors whose name begin and end with B and has at least | |
| 3characters. | |
| d. List in alphabetic order all sailors who have reserved red boat. | |
| e. Find the age of youngest sailor for each rating level. | |
| e. I fild the age of youngest sanor for each fatting level. | |
| 6. a. List the Vendors who have delivered products within 6 months from | |
| orderdate. | |
| b. Display the Vendor details who have supplied both Assembled and Subparts. | |
| c. Display the Sub parts by grouping the Vendor type (Local or Non Local). | |
| d. Display the Vendor details in ascending order. | |
| e. Display the Sub part which costs more than any of the Assembled parts. | |
| f. Display the second maximum cost Assembled part | |
| | |
| TASK-4PROGRAMS ON PL/SQL(6H) | <u> </u> |
| 1. a. Write a PL/SQL program to swap two numbers. | CO 3 |
| b. Write a PL/SQL program to find the largest of three numbers. | |
| 2. a. Write a PL/SQL program to find the total and average of 6 subjects and displaythe grade | |
| displaythegrade. | |
| b. Write a PL/SQL program to find the sum of digits in a given umber. | |
| 3. a. Write a PL/SQL program to display the number in reverse order. | |
| b. Writea PL/SQLprogram to check whether the given number is prime or not. | |
| 4. a. Write a PL/SQL program to find the factorial of a given number. | |
| b. Write a PL/SQL code block to calculate the area of a circle for a value of | |
| radiusvarying from 3 to 7. Store the radius and the corresponding values of | |
| calculated area inan empty table named areas, consisting of two columns radius | |
| and area. | |
| 5. a. Write a PL/SQL program to accept a string and remove the vowels from the | |
| string.(When 'hello' passed to the program it should display 'Hll' removing | |
| e and o from theworldHello). | |
| b. Write a PL/SQL program to accept a number and a divisor. Make sure the | |
| divisor is less than or equal to 10. Else display an error message. Otherwise | |
| Display the remainder inwords. | |

|] | TASK-5 PI | ROCEDURE | CS AND FUNCTIONS(3H) | | | | |
|---|--|--|---|------|--|--|--|
| 1. Write a funct | tion to acce | pt employee | number as parameter and return Basic | CO 3 | | | |
| +HRA together as single column. | | | | | | | |
| 2. Accept year as parameter and write a Function to return the total net salary | | | | | | | |
| spent for a give | en year. | | | | | | |
| 3. Create a fund | ction to find | d the factorial | of a given number and hence find NCR. | | | | |
| 4. Write a PL/S | QL block t | o print prime | Fibonacci series using local functions. | | | | |
| 5. Create a proc | cedure to fi | nd the lucky i | number of a given birth date. | | | | |
| 6. Create functi | ion to the re | everse of give | en number | | | | |
| | | TASK-6 TH | RIGGERS(3H) | | | | |

| TASK-7 BOOK PUBLISHING COMPANY(6H) | |
|---|------|
| A publishing company produces scientific books on various subjects. The books are written by authors who specialize in one particular subject. The company employs editors who, not necessarily being specialists in a particular area, each take sole responsibility for editing oneor more publications. | CO 3 |
| A publication covers essentially one of the specialist subjects and is normally written by a single author. When writing a particular book, each author works with on editor, but may submit another work for publication to be supervised by other editors. To improve their competitiveness, the company tries to employ a variety of authors, more than one author being a specialist in a particular subject | |
| for the above case study, do the following:1. Analyze the data required.2. Normalize the attributes. | |
| 3. Create the logical data model using E-R diagrams | |
| TASK-8 GENERAL HOSPITAL(6H) | |
| A General Hospital consists of a number of specialized wards (such as Maternity, Pediatric, Oncology, etc.). Each ward hosts a number of patients, who were admitted on the recommendation of their own GP and confirmed by a consultant employed by the Hospital. On admission, the personal details of every patient are recorded. A separate register is to be held to store the information of the tests undertaken and the results of a prescribed treatment. | CO 3 |
| A number of tests may be conducted for each patient. Each patient is assigned to one leading consultant but may be examined by another doctor, if required. Doctors are specialists in some branch of medicine and may be leading consultants for a number of patients, not necessarily from the same ward. | |
| For the above case study, do the following. 1. Analyze the data required. | |
| 2. Normalize the attributes. | |
| Create the logical data model using E-R diagrams TASK -9CAR RENTAL COMPANY(6H) | |
| A database is to be designed for a car rental company. The information required includes a description of cars, subcontractors (i.e. garages), company expenditures, company revenues and customers. Cars are to be described by such data as: make, model, year of production, engine size, fuel type, number of passengers, registration number, purchase price, purchase date, rent price and insurance details. It is the company policy not to keep any car for a period exceeding one year. | CO 4 |

| All major repairs and maintenance are done by subcontractors (i.e. franchised garages), with whom CRC has long-term agreements. Therefore, the data about garages to be kept in the database includes garage names, addresses, range of services and the like. Some garages require payments immediately after a repair has been made; with others CRC has made arrangements for credit facilities. Company expenditures are to be registered for all outgoings connected with purchases, repairs, maintenance, insurance etc. | |
|--|----------|
| Similarly, the cash inflow coming from all sources: Car hire, car sales, insurance claims must be kept of file. CRC maintains a reasonably stable client base. For this privileged category of customers special credit card facilities are provided. These customers may also book in advance a particular car. These reservations can be made for any period of time up to one month. Casual customers must pay a deposit for an estimated time of rental, unless they wish to pay by credit card. All major credit cards are accepted. Personal details such as name, address, telephone number, driving license, number about each customer are kept in the database. | |
| For the above case study, do the following:1. Analyze the data required.2. Normalize the attributes. | |
| Create the logical data model using E-R diagrams TASK -10 STUDENT PROGRESS MONITORING SYSTEM(6H) | |

- 6. Display the Students who have taken M.Sc course
- 7. Display the Module code and Number of Modules taught by each Lecturer.
- 8. Retrieve the Lecturer names who are not Module Leaders.
- 9. Display the Department name which offers 'English' module.

10. Retrieve the Prerequisite Courses offered by every Department (with Department names).

- 11. Present the Lecturer ID and Name who teaches 'Mathematics'.
- 12. Discover the number of years a Module is taught.
- 13. List out all the Faculties who work for 'Statistics' Department.
- 14. List out the number of Modules taught by each Module Leader.
- 15. List out the number of Modules taught by a particular Lecturer.
- 16. Create a view which contains the fields of both Department and Module tables.
- (Hint- The fields like Module code, title, credit, Department code and its name).
- 17. Update the credits of all the prerequisite courses to 5. Delete the Module 'History' from the Module table.

| Additional Experiments: | |
|---|----------|
| TASK -1PROCEDURES | |
| Create the procedure for palindrome of given number. Create the procedure for GCD: Program should load two registers with two Numbers andthen apply the logic for GCD of two numbers. GCD of two numbers is performed bydividing the greater number by the smaller number till the remainder is zero. If it is zero, the divisor is the GCD if not the remainder and the divisors of the previous division arethe new set of two numbers. The process is repeated by dividing greater of the twonumbers by the smaller number till the remainder is zero and GCD is found. Write the PL/SQL programs to create the procedure for factorial of given number. Write the PL/SQL programs to create the procedure to find sum of N natural number. Write the PL/SQL programs to create the procedure to find Fibonacci series. | CO 1 |
| 6. Write the PL/SQL programs to create the procedure to check the given number is perfect or not | |
| TASK -2CURSORS | |
| Write a PL/SQL block that will display the name, dept no, salary of fist highest paidemployees. Update the balance stock in the item master table each time a transaction takes place in the item transaction table. The change in item master table depends on the item id is already present in the item master then update operation is performed to decrease the balance stock by the quantity specified in the item transaction in case the item id is not present in the item master table then the record is inserted in the item master table. Write a PL/SQL block that will display the employee details along with salary using cursors. To write a Cursor to display the list of employees who are working as a Managers or Analyst. To write a Cursor to find employee with given job and dept no. Write a PL/SQL block using implicit cursor that will display message, the salaries of all the employees in the 'employee' table are updated. If none of the employee's salary are updated, we get a message 'None of the salaries were updated'. Else we get a message like for example, 'Salaries for 1000 employees are updated if there are 1000 rows in 'employee' table | CO 3 |
| Virtual Labs: http://vlabs.iitb.ac.in/vlabs-dev/labs/dblab/labs/explist.php List of Experiments with Description: Data Definition Language(DDL) Statements: (Create table, Alter table, Drop table) Aim: To Understand and Implement Data Defining Language (DDL) Statements. Objective: To understand the various aspects of Data definition language command Creating a table, with or without constraints. Understanding Data types. | ls like: |

Altering the structure of the table like adding attributes at later stage, modifying size of attributes or adding constraints to attributes.

Removing the table created, i.e Drop table in SQL.

2. Data Manipulation Language(DML) Statements

Aim: To understand the concept of implementing Data Manipulation Language(DML) statements.

The objective of the experiment is to understand various aspects of Data Manipulation Commands like:

Inserting Data into the table, (inserting all attributes in a table or inserting selected attributes in a table).

Updating Data into the table (updating all tuples in a table or updating selected tuples in a table).

Deleting Data from the table (deleting all tuples from the table(not advisable) or deleting selected tuples from the table).

3. Data Query Language(DQL) Statements: (Select statement with operations like Where clause, Order by, Logical operators, Scalar functions and Aggregate functions)

Aim: To understand various aspects of Data Query Language Commands like

Displaying all the attributes and tuples from the table.

Displaying selected attributes/tuples from the table.

Using Logical and comparison operators.

Using aggregate functions.

Using Scalar functions.

Sorting Data.

- 4. Transaction Control Language(TCL) statements: (Commit(make changes permanent), Rollback (undo)
- Aim:To understand and implement Transaction Control Language (TCL) Statements.
- Objective: To Provide the students a practical experience of how transactions could be made permanent in memory or how are they revoked.
 - 5. Describe statement: To view the structure of the table created

Aim:To understand and Implement Describe Statement which can be used to view the structure of the table created by the user.

Procedure:

The Describe command is used to view the structure of the table created.

To use the describe statement, you should have at least one table in your schema.

The syntax for describe is desc<table_name>

Example : If you would like to view Employee table, then Desc emp;

Write Query in the Query Editor and click on Execute Query button.

If you are existing user and want to save/restore your data, use Credentials.

| COURSE CONTENT | CO |
|---|------|
| Task 1 - Basics (6H) | |
| | CO 1 |
| a). Write a JAVA program to display default value of all primitive data type of | |
| JAVA? | |
| b). Write a java program that display the roots of a quadratic equation ax2+bx=0. | |
| Calculate the discriminate D and basing on value of D, describe the nature of root. ? | |
| c). Five Bikers Compete in a race such that they drive at a constant speed which | |
| may or may not be the same as the other. To qualify the race, the speed of a racer | |
| must be more than the average speed of all 5 racers. Take as input the speed of each | |
| racer and print back the speed of qualifying racers. ? | |
| d) Write a case study on public static void main(250 words) ? | |

| Task -2 Operations, Expressions, Control-flow, Strings (4H) | |
|---|------|
| a). Write a JAVA program to search for an element in a given list of elements using | CO 1 |
| binary search mechanism. ? | |
| b). Write a JAVA program to sort for an element in a given list of elements using | |
| bubble sort? | |
| (c). Write a JAVA program to sort for an element in a given list of elements using | |
| merge sort. ? | |
| (d) Write a JAVA program using String Buffer to delete, remove character. ? | |
| (e) Write a program to perform the following operations on strings through | |
| interactive input. | |
| 1) Sort given strings in alphabetical | |
| 2) Convert the strings to uppercase. ? | |
| Task -3 Class, Objects (4H) | |
| a). Write a JAVA program to implement class mechanism. – Create a class, | CO 2 |
| methods and invoke them inside main method. ? | |
| b). Write a JAVA program to implement constructor. ? | |
| TASK-4 Methods (4H) | |
| a). Write a JAVA program to implement constructor overloading. ? | CO 2 |
| b). Write a JAVA program implement method overloading. ? | |
| TASK-5 Inheritance (6H) | |
| a). Write a JAVA program to implement Single Inheritance? | CO 3 |
| b). Write a JAVA program to implement multi level Inheritance? | |
| c). Write a java program for abstract class to find areas of different shapes? | |
| TASK-6 Interfaces (6H) | |
| a). Write a JAVA program give example for "super" keyword. ? | CO 3 |
| b). Write a JAVA program to implement Interface. What kind of Inheritance can be | |
| achieved? | |
| c). Write a JAVA program to implement multiple inheritance access in java? | |
| d). Write a JAVA program by using extends and implements keywords? | |
| TASK-7 Exceptions (4H) | |
| a).Write a JAVA program that describes exception handling mechanism. ? | CO 3 |
| b).Write a JAVA program Illustrating Multiple catch clauses? | |
| TASK-8 Runtime Polymorphism (4H) | |
| a). Write a JAVA program that implements Runtime polymorphism? | CO 4 |
| b). Write a Case study on run time polymorphism, inheritance that implements in | |
| above problem? | |
| TASK-9 User defined Exception (6H) | |
| a). Write a JAVA program for creation of Illustrating throw? | CO 4 |
| b). Write a JAVA program for creation of Illustrating finally? | |
| c). Write a JAVA program for creation of Java Built-in Exceptions? | |
| d).Write a JAVA program for creation of User Defined Exception? | |
| TASK -10 Threads (4H) | |
| a). Write a JAVA program that creates threads by extending Thread class .First | CO 4 |
| | 1 |

| thread display "Good Morning "every 1 sec, the second thread displays "Hello | |
|--|------|
| "every 2 seconds and the third display "Welcome" every 3 seconds ,(Repeat the | |
| same by implementing Runnable)? | |
| b). Write a program illustrating is Alive and join ()? | |
| c). Create two threads such that one of the thread print even no's and another prints | |
| odd no's up to a given range. ? | |
| TASK-11 Threads continuity (4H) | |
| a).Write a JAVA program Producer Consumer Problem? | CO 4 |
| b).Write a case study on thread Synchronization after solving the above producer | |
| consumer problem? | |
| TASK-12 Packages (4H) | |
| a). Write a JAVA program illustrate class path? | CO 4 |
| b). Write a case study on including in class path in your OS environment of your | |
| package.? | |
| c). Write a JAVA program that import and use the defined your package in the | |
| previous | |
| Problem? | |
| d). Write a Java Program to Create a package called "Arithmetic" that contains | |
| methods to deal with all arithmetic operations. Also, write a program to use the package.? | |

| Additional Experiments: | |
|--|-------|
| TASK-1 Applet | |
| a).Write a JAVA program to paint like paint brush in applet. ? | |
| b) Write a JAVA program to display analog clock using Applet. ? | |
| c). Write a JAVA program to create different shapes and fill colors using Applet. ? | |
| d). Write an applet illustrating sequence of events in an applet. ? | |
| TASK -2 Event Handling | |
| a).Write a JAVA program that display the x and y position of the cursor movement | |
| using | |
| Mouse. ? | |
| b).Write a JAVA program that identifies key-up key-down event user entering text | |
| in a | |
| Applet. ? | |
| | |

| Semester III | 0 | 0 | 2 | 36 | 40 | 60 | 100 | | | | | | |
| Objective (s) | To | To enhance employability skills and to develop career competency | | | | | | | | | | | |

MODULE 1: Aptitude-1 (7h)

Number System, Clocks, Advanced Algebra, LCM & HCF, BODMAS, Order of Arithmetic Operations, Ratio & Proportion

MODULE 2: Reasoning-1 (6h)

Deductive Logic, Blood Relations, Puzzles, Coding & Decoding, Number Series

MODULE 3: Verbal-1 (7h)

Word formation: Prefix, suffix, synonyms, antonyms, odd words, homophones, spelling test and contextual vocabulary. Parts of speech: Nouns, adjectives, prepositions, gerunds. Sentence structures: Identifying the sentences, sentence pattern, sentence completion, sentence arrangement, joining sentences.

MODULE 4: Technical Skills-1 (8h)

Problems and Logic Building: Study of Various problems and Logic Building: Algorithms andPseudo codes; various problems using Number Series, Arrays and Strings.

Students must do the following Tasks using any online platforms of C / Python(Write

proper Pseudo codes and Algorithms also for the given problems): Number Series:

Task1: Prime series (Hint: Find Prime Series up to n)

Task2: Fibonacci Series (Hint: Find Fibonacci sequence up to n)

Arrays-

Task3: Find duplicates in an array (**Hint**: Same elements which are duplicated must identify) **Task4**: Find the Kth largest and Kth smallest number in an array (**Hint**: Finding largest and smallest number of kth position)

Strings-

Task5: Find the Nth character (Hint: Finding the given character position)Task6: Rotation of String (Hint: Rotating the characters either left or right side rotation)

MODULE 5: Technical Skills-2 (8h)

Recursion and Hashing: Recursion and Backtracking. Hashing Techniques. Students must do the following Tasks using any online platforms of **C / Python**:(Write suitable pseudo codes and algorithms for the given tasks)

Recursion and Backtracking

Task1: Largest Element in an

array

Task2: Convert Decimal to Binary Number

Task3: subset sum (Hint: Find Subsets for the given array and calculate the sum).

Task4: Word Break Problem (Hint: The given sentence must be broken into number wordsbased various delimiters).

Hashing -

Task5: Pair with given sum in an Array (**Hint**: Array elements must pair with given constraintand find the sum)

Task6: Count Distinct absolute values in a sorted array (**Hint**: Convert into absolute values andfind distinct count in a sorted array)

EVALUATION:

| | Continuous Internal Evaluation (CIE) | | | | | | | | |
|-------|---|----------|--|--|--|--|--|--|--|

| COURSE CONTENT | | | | | | | | | |
|----------------------|---|--------------------|--|--|--|--|--|--|--|
| MODULE – 1 | Introduction to R Programming | 10H | | | | | | | |
| Reading and Get | ting Data into R, Viewing Named Objects, Types of Data Items, | The Structure of | | | | | | | |
| Data Items, Wo | rking with History Commands, Saving your Work in R. Co | ntrol Statements, | | | | | | | |
| Arithmetic and 1 | Boolean Operators, Functions, Return Values, Environment an | nd Scope Issues, | | | | | | | |
| Recursion. | | | | | | | | | |
| At the end of the | Module 1, students will be able to: | | | | | | | | |
| 5. Understand | the basics of R programming. (BL-2) | | | | | | | | |
| 6. Demonstra | te the working environment of R Programming. (BL-2) | | | | | | | | |
| 7. Understand | l R programming structures. (BL-2) | | | | | | | | |
| MODULE – 2 | Objects in R and Probability methods | 10H | | | | | | | |
| Manipulating Ob | jects, Viewing Objects within Objects, Constructing Data Objects | s, Forms of Data | | | | | | | |
| Objects: Testing | and Converting. Sample Spaces, Events, Properties of Probability | v, Counting | | | | | | | |
| Methods, Conditi | onal Probability, Independent Events, Bayes' Rule, Random Var | iables. | | | | | | | |
| At the end of the | Module 2, students will be able to: | | | | | | | | |
| | objects from the keyboard, clipboard, or external data files. (BL | -2) | | | | | | | |
| 5. Demonstra | ate various commands for probability formulae. (BL-2) | | | | | | | | |
| 6. Apply pro | bability functions for problem solving in R. (BL-3) | | | | | | | | |
| MODULE – 3 | Descriptive statistical analysis | 10H | | | | | | | |
| Summary Comm | nands, Summarizing Samples, Summary Tables. Creating Da | ta for Complex | | | | | | | |
| Analysis, Summa | arizing Data. Stem and Leaf Plot, Histograms, Density Function | n, Types of Data | | | | | | | |
| Distribution, The | e Shapiro-Wilk Test for Normality, The Kolmogorov-Smirnov | Test, Quantile- | | | | | | | |
| Quantile Plots | | | | | | | | | |
| | Module 3, students will be able to: | | | | | | | | |
| | te summary commands on data, Stem and Leaf Plot & Histogram | s. (BL-2) | | | | | | | |
| | for complex analysis and summarize the data. (BL-2) | | | | | | | | |
| | arious types of distribution of data. (BL-2) | | | | | | | | |
| | te the Kolmogorov-Smirnov Test in R programming. (BL-3) | | | | | | | | |
| MODULE – 4 | Hypothesis Testing & Graphical Analysis | 9H | | | | | | | |
| U | ent's t-test, The Wilcoxon U-Test (Mann-Whitney), Paired | , | | | | | | | |
| | Covariance, Tests for Association. Box-whisker Plots, Scatter I | | | | | | | | |
| · • | ation Plots) Line Charts, Pie Charts, Cleveland Dot Charts, B | ar Charts, Copy | | | | | | | |
| Graphics to Othe | r Applications. | | | | | | | | |
| | Module 4, students will be able to: | | | | | | | | |
| 1 | orthand way of describing and summarizing data using summary | statistics. (BL-2) | | | | | | | |
| | umary tables, cross-tabulate. (BL-2) | | | | | | | | |
| 7. Conduct to (BL-2) | est for non-parametric data, paired tests for parametric and non | n-parametric data | | | | | | | |
| 8. Describe g | enerating correlation and covariance matrices. (BL-2) | | | | | | | | |
| MODULE – 5 | Complex Statistical analysis and Regression | 9H | | | | | | | |
| Examples of Usi | ng Formula Syntax for Basic tests, Formula Notation in Graph | ics, Analysis of | | | | | | | |
| Variance (ANOV | A).Simple Linear Regression, Multiple Regression, Curvilinear | Regression, | | | | | | | |
| Plotting Linear M | Indels and Curve Fitting Summarizing Regression Models | | | | | | | | |

Plotting Linear Models and Curve Fitting, Summarizing Regression Models.

At the end of the Module 5, students will be able to:

- 1. Create a range of graphs to summarize your data and results. (BL-2)
- 2. Illustrate box-whisker plots, scatter plots, including multiple correlation plots. (BL-3)
- 3. Move graphs from R to other programs and save graphs as files on disk. (BL-2)
- 4. Explain formula notation for simple hypothesis tests, graphics. (BL-2)

Content beyond syllabus: Linear Algebra Operations on Vectors and Matrices, Set Operations, Writing own scripts, Building R Packages

|-------------------|---|------------------------|--|--|--|--|--|--|
| MODULE - 1 | Physical Layer | (10H) | | | | | | |
| Data Communi | cations, Networks, Network Types, Internet History, Standards | and Administration, | | | | | | |
| Protocol Layer | ing, TCP/IP Protocol Suite, The OSI Model. Data and Sign | nals, Digital Signals, | | | | | | |
| Transmission II | npairment, Data Rate Limits, Performance. Transmission Med | ia: Introduction, | | | | | | |
| Guided Media, | Unguided Media | | | | | | | |
| At the end of the | e Module 1, students will be able to: | | | | | | | |
| | and the basics of computer networks. (BL-2) | | | | | | | |
| | e the picture of data communication with layered architecture | . (BL-2) | | | | | | |
| | e performance issues in data transmission. (BL-2) | | | | | | | |
| 4. Classify | the elements of physical media used for data transmission. (BL | -2) | | | | | | |
| MODULE –2 | Data-Link Layer & MAC | (9H) | | | | | | |
| Introduction, L | nk-Layer Addressing, Error Detection and Correction: Cyclic | Codes, Checksum, | | | | | | |
| Forward Error | Correction, Data Link Control (DLC):DLC Services, Data-Li | nk Layer Protocols, | | | | | | |
| e | Protocols, HDLC, PPP.MAC: Random Access. | | | | | | | |
| | e Module 2, students will be able to: | | | | | | | |
| - | link layer services. (BL-2) | | | | | | | |
| | Error Detection and Correction mechanisms. (BL-2) | | | | | | | |
| | e Data Link Control services and protocols. (BL-2) | | | | | | | |
| | e Media Access Control Protocols. (BL-3) | | | | | | | |
| MODULE –3 | Network Layer | (10H) | | | | | | |
| Shortest Path A | r: Network Layer Design Issues, Routing Algorithms: The Algorithm, Flooding, Distance Vector, Link State, Hierarchical, gestion Control Algorithms, Quality of Service. | | | | | | | |
| Internetworkin | g, IPV4 Addresses, IPV6, OSPF, BGP, IP. | | | | | | | |
| At the end of t | he Module 3, students will be able to: | | | | | | | |
| 9. Underst | and design issues of network layer. (BL-2) | | | | | | | |
| 10. Explain | efficient routing protocols in computer networks. (BL-2) | | | | | | | |
| 11. Discuss | the concept of internetworking and its implementation issues. (I | 3L-2) | | | | | | |
| 12. Describe | e the elements of network layer required for data transfer over In | ternet. (BL-2) | | | | | | |
| MODULE -4 | Transport Layer | (9H) | | | | | | |
| Layer. UDP, | ayer services, Elements of Transport Protocols, Congestion Co TCP, Performance problems in computer networks, Netw eal-time interactive protocols. | - | | | | | | |
| At the end of th | e Module 4, students will be able to: | | | | | | | |
| 1. Underst | and the services provided by transport layer. (BL-2) | | | | | | | |
| 2. Describe | e elements of transport layer required for data transfer over Inter | net. (BL-2) | | | | | | |
| 3. Demons | trate end to end communication. (BL-3) | | | | | | | |
| 4. Discuss | performance issues in transport layer. (BL-2) | | | | | | | |
| MODULE –5 | Application Layer | (10H) | | | | | | |
| Introduction, C | ient Server Programming-Iterative communication using UDP, | Iterative | | | | | | |
| | using TCP. Standard Client Server Protocols: WWW, HTTI -mail, TELNET, Secure Shell. | P, Domain Name | | | | | | |
| - | he Module 5, students will be able to: | | | | | | | |
| | nt client server communication. (BL-3) | | | | | | | |

- Explain the working of world wide web with HTTP, DNS. (BL-2) 2.
- Describe the protocols for mail, remote system login. (BL-2) 3.
- 4. Discuss file transfer, network management protocols. (BL-2)

|--|---|---------------------------------------|
| MODULE – 1 | Introduction | 9H |
| Evolution of operati systems, real time systems interface. T system design and in At the end of the Mo 1. Illustrate the | architecture, operating systems structure, operating systems ng systems: Simple Batch, multi programmed, time shared, parallel systems, special purpose systems, operating system services, user Types of systems calls, system programs, protection and security, mplementation, operating systems structure. odule 1, students will be able to: structure of operating system and basic architectural components in tem design. (BL-2) | distributed operating operating |
| 2. Demonstrate | how the computing resources are managed by the operating system. bjectives and functions of operating systems. (BL-2) | (BL-2) |
| MODULE -2 | Process and CPU scheduling, process coordination | 10H |
| synchronization, the problems of synchro deadlock prevention At the end of the Mo 1. Contrast the p 2. Develop appl operating syst 3. Illustrate the systems. (BL | various resource management techniques for timesharing and distrib-2) | and classic deadlocks, ock. |
| | llock and deadlock mechanisms.(BL-2) | 1011 |
| MODULE-3 Swapping, contiguo | Memory management and virtual memory ous memory allocation, paging, structure of page table. Segment | 10H ation with |
| paging, virtual mem replacement algorith At the end of the Mo 1. Demonstrate 2. Illustrate the algorith 3) 3. Identify how different procession | hory, demand paging; Performance of demand paging: Page replaced nms, allocation of frames, thrashing. odule 3, students will be able to: the virtual memory, entities and attributes. (BL-3) mapping from virtual memory address to physical address and vice-v a shared memory area can be implemented using virtual memory ac resses. (BL-3) yeen Paging and Segmentation. (BL-2) | ment, page versa. (BL- |
| MODULE-4 | File system interface | 9H |
| protection, file sys | file, access methods, directory structure, file system mounting, f tem structure. File system structure, File system implementation ocation methods, free space management. | |

At the end of the Module 4, students will be able to:

- 5. List the mechanisms adopted for file distribution in applications. (BL-1)
- 6. Explain the need of memory management in operating systems and understand the limits of fixed memory allocation schemes. (BL-2)
- 7. Organize file management when designing or developing a new operating system.

(BL-3)

MODULE-5Mass-storage structure10HOverview of mass storage structure, Disk structure, Disk attachment, Disk scheduling, Disk
management, Swap space management, RAID structure, Stable storage implementation. goals of
protection, principles of protection, domain of protection, access matrix, implementation of access
matrix

At the end of the Module 5, students will be able to:

- 1. Illustrate the fragmentation in dynamic memory allocation, and identify dynamic allocation approaches.(BL-2)
- 2. Illustrate how program memory addresses relate to physical memory addresses, memory management in base-limit machines, and swapping.(BL-2)
- 3. Compare RAID levels of memory.(BL-2)
- 4. Illustrate various disk scheduling algorithms.(BL-2)
- 5. Understand the access control and protection mechanisms. (BL-2)

Total hours: 48 hours

Content beyond syllabus:

Linux operating systems, Multiprocessor management systems, Unix features, real time operating systems, modern operating systems.

COURSE CONTENT

| MODULE – 1 | The Software Process | 10h |
|------------|----------------------|-----|

The Nature of Software, The Unique Nature of Web Apps, Software Engineering, The Software Process, Software Engineering Practice, Software Myths. A Generic Process Model, Process Assessment and Improvement, Prescriptive Process Models, Specialized Process Models, The Unified Process, Personal and Team Process Models, Process Technology, Product and Process. Agility and the Cost of Change, Agile Process, Extreme Programming, Other Agile Process Models.

At the end of the Module 1, students will be able to:

1.Demonstrate the different phases involved in the software development. (BL-3)

2. Classify the various process models. (BL-2)

3. Identify suitable lifecycle model to be used. (BL-3)

4. Identify the need of agility and examine Agile process models (BL-3)

| MODULE -2 | Modeling Concepts | 10h |
|-----------|-------------------|-----|
| | | |

Class Diagrams, Deployment Diagrams, Use-Case Diagrams, Sequence Diagrams, Communication Diagrams, Activity Diagrams, State Diagrams. Requirements Engineering, Eliciting Requirements, Developing Use Cases, and Building the requirements model, Negotiating Requirements, Validating Requirements. Requirements Analysis, Scenario-Based Modeling, UML Models that Supplement the Use Case, Data Modeling Concepts, Class-Based Modeling.

At the end of the Module 2, students will be able to:

- 1. Understand the requirements. (BL-2)
- 2. Solve the problem by defining the computing requirements of the problem. (BL-3)
- 3. Organize the scenario-based modeling and class based modeling in the design phase (BL-3)
- 4. Construct SRS for Problems. (BL-3)

| MODULE-3 | Design concepts | 10h |
|----------|-----------------|-----|
| | | |

Design with Context of Software Engineering, The Design Process, Design Concepts, The Design Model. Software Architecture, Architecture Genres, Architecture Styles, Architectural Design, Assessing Alternative Architectural Designs, Architectural Mapping Using Data Flow. Component, Designing Class-Based Components, Conducting Component-level Design, Designing Traditional Components, Component-Based Development.

At the end of the Module 3, students will be able to:

- 1. Identify the basic issues in software design. (BL-3)
- 2. Illustrate the importance of software architecture. (BL-2)

3. Apply the standard design principles based on suitable Architecture. (BL-3)

| MODULE-4 | User Interface Design, Coding and Testing | 9h | | | | | | |
|--|---|---------|--|--|--|--|--|--|
| Characteristics of a Good User Interface, Basic Concepts, Types of User Interfaces, Fundamentals | | | | | | | | |
| of Component-b | of Component-based GUI Development, A User Interface Design Methodology. Coding, Code | | | | | | | |
| Review, Softwar | e Documentation, Testing, Unit Testing, Black-box Testing, White | ite-Box | | | | | | |
| Testing | | | | | | | | |
| At the end of the | Module 4, students will be able to: | | | | | | | |
| 1. Analyze | the architecture styles and build the system from the components. | (BL-3) | | | | | | |
| 2. Describe | the golden rules in designing and analyzing UI. (BL-2) | | | | | | | |

- 3. Explain the user interface design process. (BL-2)
- 4. Explain the MVC (model-view-controller) design pattern and its importance to sound user interface software design and implementation. (BL-2)

| MODULE-5 | Software Quality & Product Metrics | 9h |
|-----------------|---|------------------|
| Software Oualit | y, Software Quality Management System, ISO 9000, SEI Capa | ability Maturity |

Model Product metrics :Metrics for Requirements Model, Metrics for Design Model, Metrics for source code, Metrics for testing, Metrics for maintenance.

At the end of the Module 5, students will be able to:

- 1. Illustrate the strategic approach to software testing (BL-2)
- 2. Describe the art of debugging (BL-2)
- 3. Explain the various testing strategies (BL-2)
- 4. Describe the Product metrics inSoftware Quality(BL-2)

Total hours: **48** hours

Virtual Labs

1.<u>https://app.cybrary.it/browse/next-tech-course/transfer-learning-r-</u>

programming?queryID=4c4829fb170457c5c2c5cff546ef2cf5&objectID=46375

In this virtual lab, you will learn the fundamentals of the R programming language, one of the most common programming languages utilized by data scientists and machine learning engineers. In this introductory lab you will learn the basics of objects, strings, data, and expressions for use in R.

List of Experiments:

1.1Quick Start

1.2Basic Objects

1.3 Managing Your Workspace

1.4Basic Expressions

1.5Working with Basic Objects

- 1.6Working with Strings
- 1.7Working with Data

2. <u>https://app.cybrary.it/browse/next-tech-course/transfer-exploratory-data-analysis-in-r?queryID=7a61f9add7d43824dbbb5ca78171278c&objectID=46289</u>

In this virtual lab, we will take a deeper dive into R in order to conduct some exploratory data analysis to convert structured data into usable models/charts for analysis. This will cover critical topics in R and data science such as data set extraction, data partitions, and data visualization

List of Experiments:

What's in There - Exploratory Data Analysis

2.2Creating Standard Data Summaries

2.3Extracting a Subset of a Dataset

Splitting a Dataset

Creating Random Data Partitions

Generating Standard Plots, such as Histograms, Boxplots, and Scatterplots

2.7Generating Multiple Plots on a Grid

2.8Creating Plots with the `lattice` Package

2.9Creating Charts that Facilitate Comparisons

2.10Creating Charts That Help to Visualize Possible Causality

3. <u>https://app.cybrary.it/browse/next-tech-course/transfer-regression-analysis-in-r?queryID=655394865504019e0f9b3fb59c3cb66e&objectID=46430</u>

In this virtual lab, you will utilize foundational knowledge of R in order to approach machine learning model driven regression analysis solutions to validate and measure the performance of said models. More specifically, we will cover linear regression, neural networks, regression trees, variable selection, and more.

List of Experiments:

Give Me a Number - Regression

3.2Computing the Root-Mean-Square Error

3.3Building KNN Models for Regression

3.4Performing Linear Regression

3.5Performing Variable Selection in Linear Regression

3.6Building Regression Trees

3.7Building Random Forest Models for Regression

3.8Using Neural Networks for Regression

3.9Performing K-Fold Cross-Validation

3.10Performing Leave-One-Out Cross-Validation to Limit Overfitting

| TASK -3 | |
| Write a C program to simulate the following file organization techniques | CO 2 |
| (a) Hierarchical | |
| (b) DAG | |
| Virtual Labs: | |
| http://vlabs.iitkgp.ernet.in/ant/ | |

The Advanced Network Technologies Virtual Lab has been developed by keeping in mind the following objectives:

- To impart state-of-the-art knowledge on advanced topics in Computer Networks in an interactive manner through the Web
- Introduce the concept of network simulation to the students
- Involve students in analytical studies of Computer Networks through network simulation

All the while it is intended to present Computer Networks as an interesting subject to the students where learning and fun can go alongside.

| Computer Networks | |
| Task 1 - Framing methods (3H) | |
| Implement the following data link layer framing methods | CO 3 |
| (a) Bit stuffing. | |
| (b) Character stuffing | |
| Task - 2 Encoding & Decoding (3H) | |
| Write a program to compute CRC code for the polynomials CRC-12, CRC-16 | CO 3 |
| Task -3 Sliding window protocols (3H) | |
| Develop a simple data link layer protocol that performs the flow control using the | CO 3 |
| sliding window protocol, and loss recovery using the Go-Back-N mechanism | |
| TASK -4 Dijsktra's algorithm (3H) | |
| Implement Dijsktra's algorithm to compute the shortest path through a network | CO 4 |
| TASK -5 Distance vector routing (3H) | |
| Implement distance vector routing algorithm for obtaining routing tables at each | CO 4 |
| node | |
| TASK-6 Open Shortest Path First (3H) | |
| Implement distance vector routing algorithm for obtaining routing tables at each | CO 4 |
| node | |
| TASK -7 Leaky bucket algorithm (3H) | |
| Write a program for congestion control using Leaky bucket algorithm. | CO 4 |
| | |
| | |
| Additional Experiments: | |
| TASK -1 TCP Client server Programming | |
| Implement TCP Client server communication | CO 3 |
| | |
| TASK -2 UDP Client server Programming | CO 3 |
| Implement UDP Client server communication | |

| COURSE CONTENT | СО |
|--|------|
| Task 1 - Role of Software (6H) | |
| Objective: To identify the role of software in today's world across various | CO 1 |
| domains. | |
| Software is also a predominant are for trade and export especially for the countries | |
| like India. Domains like health care, Airlines , financial Services, Insurance , | |
| retails, Education, and many more have exploited software and still there a lot of | |
| the scope for software to create impact and add values in multiple dimensions. | |
| Problem Description: In the context of this background, identify the areas (or | |
| application or systems) how software has been leveraged extensively in the | |
| following domains | |
| Health Care 2. Airlines 3. Banking Insurance 4. Retail 5. Education Summary | |

| dentify the role of software across multiple domains related to day to day life. | |
|--|------|
| Task -2 SOFTWARE DEVELOPMENT LIFE CYCLE MODELS (6H) | |
| Objective: To identify the suitable process model. | CO 1 |
| Justify the best suitable SDLC for the following: | |
| a. College automation system | |
| b. online shopping | |
| Task -3 SOFTWARE REQUIREMENTS SPECIFICATION (6H) | |
| Describe the individual phases/modules of the project, Identify deliverables. | CO 2 |
| a) Prepare SRS for Online Railway reservation system. | |
| b) Prepare SRS for Hotel Management system. | |
| TASK-4 DATA MODELLING (6H) | |
| Draw use case diagram for Online Movie ticket reservation. | CO 2 |
| Prepare use case diagram for Online airline reservation system | |
| TASK-5 CLASS MODELLING (6H) | |
| Draw class diagram for Health care center. | CO 2 |
| Draw class diagram for inventory system. | |
| TASK-6 DATA MODELLING (6H) | |
| Draw the class and use case diagram for Hospital management system? | CO 2 |
| TASK-7 SOFTWARE TESTING (3H) | |
| Write the test cases for Banking application | CO 4 |
| TASK-8 SOFTWARE TESTING (3H) | |
| Create a test plan documentation for Library management system. | CO 4 |
| TASK-9 SOFTWARE TESTING | |
| UML Diagrams for develop the AUTOMATED TELLER MACHINE (ATM) application | CO 4 |
| TASK -10 SOFTWARE TESTING | |
| UML Diagrams for develop the LIBRARY INFORMATION SYSTEM application. | CO 4 |

| Additional Experiments: | |
|--|------|
| TASK-13 SOFTWARE METRICS | CO 4 |
| ke ATM system study its system specification and report various bugs | |
| TASK -14 SOFTWARE DESIGN | CO 3 |
| A program written in c language for Matrix multiplication fails. Introspect the causes for failure and write down the possible reasons for failure | |

| Virtual Labs: | |
|---|--|
| http://vlabs.iitkgp.ernet.in/se/ | |
| To draw activity flow diagram for Library information system. | |
| Draw a sequence diagram for Library information system. | |
| Draw a state chart diagram for Library information system. | |
| Write the test suites for user login functionality for library management system. | |
| Determine the Cyclomatic complexity for the "ReissueBook" method as shown | |
| below: | |
| public ID ReissueBook(ID userID, ID bookID) { | |
| Member user = Member.GetMember(userID); | |
| ID transactionID = null; | |
| if (user.canIssueNow() &&Book.IsAvailable(bookID)) { | |
| Integer count = user.getReissueCountFor(bookID); // # of times this books has | |
| been reissued after it's recent issue by the user | |
| if (count < REISSUE_LIMIT) { | |
| user.incrementReissueCount(bookID); | |
| BookTransaction transaction = new BookTransaction(userID, bookID); | |
| transaction.save(); | |
| <pre>transactionID = transaction.getID();</pre> | |
| } | |
| } | |
| return transactionID; | |

MODULE 1: Aptitude-2 (7h)

Ages, Alligations & Mixtures, Averages, Partnership, Calendars, Time & Work, Chain Rule, Pipesand Cisterns,

MODULE 2: Reasoning-2 (6h)

Odd Man Out/ Objective Reasoning, Missing Number, Logical word Sequence, Directions, Seating Arrangement, Logical Statement Assumption, Data Arrangements

MODULE 3: Verbal-2 (7h)

Articles, Tenses. Voice (Active & Passive), speech (direct and indirect), one word substitution, Idioms and phrases. Tag questions, subject verb arrangement, Paragraph writing (passage completion, Para completion, fill in the blanks)

MODULE 4: Technical Skills-3 (8h)

Linked Lists: single and Double Linked List Problems. Solve the given Tasks in **CodeTantra** Platform using C/Python/Java.

Single and Double Linked List -

Task1: Find sum of even positions in a given Linked List (Hint: Construct linked list and find theeven positions in the list and calculate the sum value).

Task2: Check whether 2 Lists are same. (Hint: Lists must be equal number of elements).

Task3: Reverse the values in a List and display. (Hint: Read from last element to first element) **Task4:** Double Linked List Insertion and Deletion of element. (Hint: Construct Double linked listand insert and delete the element in a given position).

Students may solve at least any other 5 problems under "Easy/Medium" category in **HackerRank** other than the given Tasks.

MODULE 5: Technical Skills-4 (8h)

Searching & Sorting: Searching & Sorting Algorithms and related Applications. Solve the given Tasks in **CodeTantra** Platform using C/Python/Java.

Searching and Sorting

Task1: Searching an Element in a linked list using liner search technique. (Hint: Construct aLinked List and find the element in given location).

Task2: Search an Element in a linked list in using Binary Search Technique (Construct a linked list and sort the elements and find the given element).

Task3: Quick Sort Application (Hint: Solve the problem using Divide and Conquer technique) **Task4:** Merge sort Application (Hint: Solve using Recursive technique).

Students may solve at least any other 5 problems under "Easy/Medium" category in Hacker Rank other than the given Tasks.

COURSE CONTENT

10H

Introduction: Algorithm, Algorithm specification, Performance analysis. Divide and Conquer: General method, Binary Search, Finding the maximum and minimum, Mergesort, QuickSort, Selection, Strassen's matrix multiplication.

LEARNING OUTCOMES:

MODULE – 1

At the end of this Module students will be able

- 1. Derive the recurrence equation for running time of a given algorithm and solve.
- 2. Understand the general principle of Divide and Conquer and identify suitable problems to apply Divide and Conquer paradigm

- 3. Analyze the time complexities of Binary Search, Finding the maximum and minimum, and Strassen's matrix multiplication algorithms.
- 4. Compare complexities of Merge sort, Quick sort and Selection sort techniques

| | | - | | | | | | | |

| | s, 0/1 knapsack, the traveling salesperson problem. | | | | | | | | |
| LEARNING OUT | | | | | | | | | |
| | Module students will be able: | | | | | | | | |
| | l optimization problems and the general principles of Greedy and Dy | namic | | | | | | | |
| U | ng paradigms to solve them | | | | | | | | |
| | ciple of optimality with examples. | | | | | | | | |
| | te Greedy and Dynamic programming paradigms. | | | | | | | | |
| | amic programming strategy for Optimal binary search trees, Multista | age graphs, All- | | | | | | | |
| pairs shorte | est paths, 0/1 knapsack, the traveling salesperson problem. | | | | | | | | |
| MODULE – 3 | | 10H | | | | | | | |
| | nd Search Techniques: Techniques for binary trees, Techniques for | | | | | | | | |
| components and Di Back tracking: G Hamiltonian cycles LEARNING OUT At the end of this 1. Illustrate g 2. Determine First Span 3. Demonstr | eneral Method, 8 – queens problem, Sum of subsets problem, G , Knapsack Problem. TCOMES: Module students will be able: graph search strategies : BFS, DFS and D-Search . e articulation points and bi-connected components in a given gr ning Trees ate the recursive and iterative backtracking algorithms. ktracking strategy to solve N – queens problem, Sum of subse | raph coloring and | | | | | | | |
| MODULE – 4 | | 10H | | | | | | | |
| Branch and Bou | ind: The method, Travelling salesperson, 0/1 Knapsack pro | blem, Efficiency | | | | | | | |
| considerations. | | | | | | | | | |
| Lower Bound Theory: Comparison trees, Lower bounds through reductions – Multiplying triangular matrices, inverting a lower triangular matrix, computing the transitive closure. | | | | | | | | | |
| LEARNING OUT | TCOMES: | | | | | | | | |
| At the end of this Module students will be able: | | | | | | | | | |
| 1. Illustrate the state space search techniques; FIFO, LIFO and LC. | | | | | | | | | |

 Illustrate the state space search techniques; FIFO, LIFO and LC.
 Analyze the advantage of bounding functions in Branch and Bound technique to solve the Travelling Salesperson problem.

- 3. Compare the LC and FIFO branch and bound solutions for 0/1 knapsack problem.
- 4. Understand lower bound theory concept in solving algebraic problems.

MODULE – 5

9H

NP – Hard and NP – Complete Problems: NP Hardness, NP Completeness, Consequences of being in P, Cook's Theorem, Reduction Source Problems, Reductions: Reductions for some known problems

LEARNING OUTCOMES:

At the end of this Module students will be able:

- 1. Differentiate deterministic and Non-deterministic algorithms. 105 Page
- 2. Define P, NP, NP -hard and NP-complete classes of problems.
- 3. Understand the satisfiability problem.
- 4. State Cook's Theorem.
- 5. Understand the reduction techniques.

Total hours: 48 hours

| 2. Interpre | et the working examples using various android components (B) | L-2) | | | | | | | |
| 3. Solve b | asic level android applications using activities (BL-3) | | | | | | | | |
| MODULE – 3 | Building Blocks for Android Application Design | 12H | | | | | | | |
| Introduction to L | ayouts, Linear Layout, Relative Layout, Absolute Layout, Us | ing Image View, | | | | | | | |
| Frame Layout, Ta | ble Layout, Grid Layout, Adapting to Screen orientation. | | | | | | | | |
| Utilizing Resource | Utilizing Resources and Media Resources, Creating Values Resources, Using Drawable | | | | | | | | |
| Resources, Switching States with Toggle Buttons, Creating an Images Switcher Application, | | | | | | | | | |
| Scrolling Through Scroll View, playing Audio, Playing Video | | | | | | | | | |
| At the end of the Module 3, students will be able to: | | | | | | | | | |
| 1. Understand the various types of layouts (BL-1) | | | | | | | | | |
| 2. Analyze the various screen orientation strategies (BL-2) | | | | | | | | | |
| 3. Illustrate various components to implement audio and video applications (BL-4) | | | | | | | | | |
| MODULE – 4 | Selection widgets And Fetching Information Using | 9H | | | | | | | |
| | Dialogs and Fragments | | | | | | | | |

Using List View, Using the Spinner control, Using the GridView Control, Creating an Image Gallery Using the ViewPager Control.

Dialogs, Selecting the Date and Time in One Application, Fragments, Creating Special Fragments.

At the end of the Module 4, students will be able to:

- 1. Understand the special controls like viewpager, GridView like controls (BL-1)
- 2. Apply various applications using dialogs (BL-3)
- 3. Remember the concepts of application development using Fragments (BL-1)

| MODULE – 5 | Building Menus | 12H |
|------------|----------------|-----|
| | | |

Creating Interface Menus and Action Bars, Menus and Their Types, Creating Menus Through XML, Creating Menus Through Coding, Applying a Context Menu to a List View, Using the Action Bar, Replacing a Menu with the Action Bar, Creating a Tabbed Action Bar, Creating a Drop-Down List Action Bar.

At the end of the Module 5, students will be able to:

- 1. Understand the concepts of Menus (BL-2)
- 2. Analyze the working of various types of android menus (BL-2)
- 3. Understanding the special components like Tabbed Action Bar and Drop down list (BL-2)

| Total hours: | 50 hours |

|---|---|-------------------|
| MODULE – 1 | WWW and JAVASCRIPT | 8H |
| CSS. JAVASCR Expressions and Handling – JSON | technologies Overview – Internet Standards & Protocols - IPT: Introduction to Scripting - Data types and Variables - Statements - Functions - Arrays - Objects - Document Objects Module 1, students will be able to: | Operators, |
| | stand the concepts of internet standards (BL-2) | |
| | stand the concepts of memer standards (BL-2) | |
| | functions, arrays and object principles on basic program | ming (BL-3) |
| MODULE – 2 | SERVLETS | 9H |
| Handling - Under | rvlet Architecture - Servlet Life Cycle - Form GET and POST standing Cookies - Database Connectivity - JDBC. | Cactions- Session |
| | Module 2, students will be able to: | |
| | stand the Servlet concept to be used at server side (BL-1) | |
| 2. Analyz | ze the life cycle principles of Servlet concept (BL-2) | |
| 3. Apply | JDBC Concepts in server side scripting using Servlets (BL-3) | |
| MODULE – 3 | PHP | 12H |
| and Time Function | - Conditions, Branches, Loops - Arrays & Strings - Regular E ons - Integer and Float Functions - User-Defined Functions - - Cookies - Database Connectivity. | |
| At the end of the I | Module 3, students will be able to: | |
| 1. Under | stand the concepts of PHP basic programming (BL-2) | |
| 2. Illustra | ate various constructs in PHP to write server side scripting (BL | -1) |
| 3. Apply | database connectivity through Form Processing using P | HP (BL-3) |
| MODULE – 4 | JQUERY | 9H |
| | luction to JQuery – Selectors – Elements: Manipulations, Char Models: Event handlers – Animations & Effects – Functions – | |
| At the end of the I | Module 4, students will be able to: | |
| 1. Remen | nber the concepts of JQUERY (BL-1) | |
| 2. Analyz | ze the various event models in JQUERY (BL-2) | |
| 3. Apply | concepts of JQUERY to develop various applications (B | L-3) |
| MODULE – 5 | ANGULAR 10 and REACTJS 16 | 12H |
| Binding - Directiv | Typescript 3.8 – Node.js 14 - Angular Web Application - Co yes - Pipes - Service - Event Binding – Forms. React Features- ReactJS Vs React native-React JSX-compor | _ |
| lifecycle-events-f | orms-router-animation-table. | |

At the end of the Module 5, students will be able to:

- 1. Understand the web applications using NODEJS (BL-1)
- 2. Implement various services using NODEJS (BL-2)
- 3. Compare Angular JS with React JS (BL-2)

Pre-requisite: Database Management System and Data Warehousing and Mining

Course Objectives:

- 1. To learn the fundamentals of data science
- 2. Provide insights about the basic roles of a Data Scientist.
- 3. Develop a greaterUnderstanding of the Data Science process techniques.
- 4. Develop problem-solving skills on machine learning.

| Course Ou | Course Outcomes: After successful completion of the course, the student will be able to: | | | | | | | |
|-----------|--|--|--|--|--|--|--|--|
| C01 | Illustrate the concepts of Data Science and Big data. (BL-2) | | | | | | | |
| CO2 | Demonstrate the Data Science Process for Data Analysis. (BL-2) | | | | | | | |
| CO3 | Illustrate the large data on single computer and frameworks for big data. (BL-2) | | | | | | | |
| CO4 | Demonstrate databases for NoSQL and graph based data types. (BL-2) | | | | | | | |
| CO5 | Apply machine learning algorithms for Data Science. (BL-3) | | | | | | | |

| MODULE – 1 | Introduction of Data Science and Big Data | 8H |
| | roduction to Data Science, Examples, Data Sources, Cha dy of data science with databases, facets of data, big dat | |
| LEARNING OUT | COMES: | |
| At the end of this | Module students will be able: | |
| 1. Understan | d basic concepts of data science(L2) | |
| 2. Understand | d big data ecosystem and various data sources(L2) | |
| MODULE – 2 | Data Science Process | 9H |
| project charter, Ro analysis, build the LEARNING OUT At the end of this | cess: Overview of the Data Science Process, defining research etrieving data, Cleansing, integrating and transforming data, ex <u>a models, presenting findings and building applications on top</u> CCOMES: Module students will be able: d the data science process(L2) | ploratory data |
| | lata science process techniques for analysis(L3) | |
| MODULE – 3 | Handling Large Data on single Computer and Big Data frameworks | 11H |
| General technique large data sets. First Steps in Big LEARNING OUT At the end of this 1. Understand | data on a Single Computer: The problem you face whe es for handling large volumes of data, General Programming g Data: Distributing data storage and processing with framewor COMES: Module students will be able: how to handle large data on single computer (L2). distributed data storage and processing data with frameworks (L2). | g tips for dealing with |
| MODULE – 4 | NoSQL databases and Graph databases | 9H |
| NoSQL database The rise of grap connected data ex LEARNING OUT | bh database: Introducing connected data and graph databa ample. | |
| At the end of this | | |
| | NoSQL databases and data types (L2) | |

| MODULE – 5 | 5 Importance of Machine learning in Data Science 11H | | | | | | | |
|---|---|----------|--|--|--|--|--|--|
| Machine Learni | Machine Learning: Introduction to machine learning, applications for machine learning in data | | | | | | | |
| science, python tools used in machine learning, the modeling process, types of machine leaning. | | | | | | | | |
| | | | | | | | | |
| LEARNING OUT | COMES: | | | | | | | |
| At the end of this | Module students will be able: | | | | | | | |
| 1. Demonstra | te the way to use machine learning algorithms. (L2). | | | | | | | |
| 2. Understand | basic concepts of machine learning techniques using python tools (| (L2) | | | | | | |
| | Total hours: | 48 hours | | | | | | |
| | | | | | | | | |

| List of Tasks | |
|---|--------------------------------|
| TASK – 1 | 3H |
| (a)Python installation for WINDOWS (b)Installation of Jupyter No. | otebook |
| | |
| TASK - 2 | 3H |
| (a) Write a Numpy program to add a border filled with 0's around the | e existing array. |
| (b) Write a Numpy program to get the unique elements of an array. | |
| (c)Write a Numpy program to get the values and indices of the eleme | ents that are bigger than10 in |
| a given array. | |
| TASK – 3 | 3H |
| (a) Write a pandas program to create and display a data Frame from | a specified dictionary data |
| which has the index labels. | |
| (b) Write a pandas program to select the rows where the score is miss | sing, i.e. is NaN. |

| TASK – 4 | 3Н |
|---|-------------|
| (a)Write a Python program to draw a scatter plot with empty circles taking a random | |
| distribution in X and Y and plotted against each other. | |
| (b) Write a Python program to create a pie chart with a title of the popularity of program | amming |
| languages. | |
| TASK – 5 | 3Н |
| (a) Install Plotly | |
| (b) Create Line Chart, Bar Chart, Pie Charts using Plotly. | |
| (c) Create Box Plots, Violin Plots, Heatmaps using Plotly | |
| TASK - 6 | 3H |
| Develop the model Simple Linear regression with Python. | |
| TASK – 7 | 3Н |
| Develop the model Multiple Linear regression with Python. | |
| TASK – 8 | 3Н |
| Write a program to implement Logistic Regression. | |
| TASK – 9 | 3Н |
| Write a program to implement the Decision Tree Regression model | |
| TASK – 10 | 3Н |
| Write a program to implement the Random Forest Classification model. | |
| TASK – 11 | 3H |
| Write a program to implement the K-Nearest Neighbor algorithm to classify the give | en dataset. |
| TASK – 12 | 3Н |
| Write a program to implement the Support Vector Machine algorithm. | |
| Additional Tasks | |
| Write a program to implement the Naïve Bayesian classifier for a simple training da .CSV file. Write a program to implement the k-Means clustering algorithm to cluster the set of CSV file. | |
| .CSV file. Total hours: | 36 hours |
| | |

| COURSE CONTENT | | | | | | | | | |
|---------------------|--|-------------|--|--|--|--|--|--|--|
| MODULE – 1 | Introduction to Python | 10 H | | | | | | | |
| History of Python, | Features of Python Programming, Applications of Python Pr | ogramming, | | | | | | | |
| Running Python S | Scripts, Comments, Typed Language, Identifiers, Variables, | , Keywords, | | | | | | | |
| Input/output, Inder | tation, Data types, Type Checking, range(), format(), Math n | nodule. | | | | | | | |
| At the end of the N | Iodule 1, students will be able to: | | | | | | | | |
| 4. Learn the | basics of python. (BL - 1) | | | | | | | | |

| 5. Write the python programs. (BL - 1) 6. Understand concept of type checking. (BL - 2) MODULE -2 Operators Expressions and Functions 10 H Arithmetic, Assignment, Relational, Logical, Boolean, Bitwise, Membership, Identity, Expressions and Order of Evaluations, Control Statements.Defining Functions, Calling Functions, Anonymous Function, Fruitful Functions and Void Functions, Parameters and Arguments, Passing Arguments, Types of Arguments, Scope of variables, Recursive Functions. At the end of the Module 2, students will be able to: 4. Solve the problems using operators, conditional and looping. (BL - 3) 5. Solve the problems using the functions. (BL -3) 6. Apply the principle of recursion to solve the problems. (BL-3) MODULE-3 Strings, Lists, Tuples, and Dictionaries 9 H Strings- Operations, Slicing, Methods, List- Operations, slicing, Methods, Tuple-Operations, Methods, Dictionaries- Operations, Methods, Mutable Vs Immutable, Arrays Vs Lists, Map, Reduce, Filter, Comprehensions. 4. Write programs for manipulating the strings. (BL - 1) 5. Understand the knowledge of data structures like Tuples, Lists, and |
|---|
| MODULE -2Operators Expressions and Functions10 HArithmetic, Assignment, Relational, Logical, Boolean, Bitwise, Membership, Identity, Expressions and Order of Evaluations, Control Statements.Defining Functions, Calling Functions, Anonymous Function, Fruitful Functions and Void Functions, Parameters and Arguments, Passing Arguments, Types of Arguments, Scope of variables, Recursive Functions.At the end of the Module 2, students will be able to: 4. Solve the problems using operators, conditional and looping. (BL - 3) 5. Solve the problems using the functions. (BL -3) 6. Apply the principle of recursion to solve the problems. (BL-3)MODULE-3Strings, Lists, Tuples, and Dictionaries9 HStrings- Operations, Slicing, Methods, List- Operations, Methods, Mutable Vs Immutable, Arrays Vs Lists, Map, Reduce, Filter, Comprehensions.At the end of the Module 3, students will be able to: 4. Write programs for manipulating the strings. (BL - 1) 5. Understand the knowledge of data structures like Tuples, Lists, and |

| 5. Understand the knowledge of data structures like Tuples, Lists, and |
| |
| Distinguise (BL 2) |
| Dictionaries.(BL - 2)6. Select appropriate data structure of Python for solving a problem.(BL -3) |
| MODULE-4Files, Modules and Packages10 H |
| Files- Persistent, Text Files, Reading and Writing Files, Format Operator, Filename and |
| Paths, Command Line Arguments, File methods, Modules- Creating Modules, Import |
| Statement, Form. Import Statement, name spacing, Packages- Introduction to PIP, |
| Installing Packages via PIP(Numpy). |
| At the end of the Module 4, students will be able to: |
| 4. Understand the concepts of files. (BL - 2) |
| 5. Implement the modules and packages. (BL - 3) |
| 6. Organize data in the form of files. (BL - 3) |
| MODULE-5 Object Oriented Programming, Errors and Exceptions 9 H |
| Object Oriented Features, Classes, self variable, Methods, Constructors, Destructors, |
| Inheritance, Overriding Methods, Data hiding, Polymorphism. Difference between an error |
| and Exception, Handling Exception, try except block, Raising Exceptions. |
| At the end of the Module 5, students will be able to: |
| 4. Apply object orientation concepts.(BL -3) |
| 5. Apply the exception handling concepts. (BL -3) |
| 6. Implement OOPs using Python for solving real-world problems. (BL -3) |
| Total hours: 48 Hours |

Content Beyond Syllabus: Turtle Module, GUI Programming, Matplotlib, Databases.

| | COURSE CONTENT | | | | | | |
|--|--|--------|--|--|--|--|--|
| MODULE – 1 | Basic concepts of java | 9h | | | | | |
| The History and | Evolution of java: OOP Concepts, History of java, The java Buzz | words, | | | | | |
| The Evolution of java, Lexical issues. Data types, variables: Data types, Variables, The | | | | | | | |
| Scope and Life | e time of variables, Operators, Expressions, Control statements, | Туре | | | | | |

conversion and casting, Command Line Arguments.

At the end of the Module 1, students will be able to:

- 4. Describe the Purpose of Object oriented Programming Concepts.(BL-2)
- 5. Understand the importance of java. (BL-2)
- 6. Identify various basic components of java. (BL-2)
- 7. Implement programs on fundamental concepts of java. (BL-2)

MODULE -2Arrays and String Handling9hArrays: Declaration, Initialization and accessing values, One-Dimensional Arrays, Multi-
dimensional arrays, Alternative Array Declaration Syntax, var-arg methods. Strings:
Explore String class, StringBuffer and StringBuilder classes.9h

At the end of the Module 2, students will be able to:

- 4. Understand Arrays and accessing array values. (BL-2)
- 5. Demonstrate1-D and Multi-dimensional arrays. (BL-2)
- 6. Illustrate the String and StringBuffer Classes. (BL-2)

| MODULE-3 | .E-3 Classes, Inheritance and polymorphism | | | | | | | | | |
|---|---|------|--|--|--|--|--|--|--|--|
| Class fundame | nentals. Declaration objects, Assigning object reference variable | les, | | | | | | | | |
| Introducing M | lethods, Constructors, "this" keyword, Garbage collection. Inheritan | nce | | | | | | | | |
| basics, Using | basics, Using Super keyword, Types of inheritance, Benefits, Member access rules, | | | | | | | | | |
| Constructor and calling sequence, Using abstract Classes, Using final keyword. Method | | | | | | | | | | |
| overriding and | overloading. | | | | | | | | | |

At the end of the Module 3, students will be able to:

- 5. Understand the basic syntax for class fundamentals. (BL-2)
- 6. Demonstrate Access modifiers in Inheritance. (BL-2)
- 7. Compare "Method overloading and Method overriding". (BL-3)

| 1 | | | | | | | | |
|--|--|-------|--|--|--|--|--|--|
| MODULE-4 | JLE-4 Packages and Exception Handling | | | | | | | |
| Defining an int | terface, Implementing interface, Accessing interface properties. Defi | ining | | | | | | |
| Package, finding packages and class path, accessing Protection. Exception hand | | | | | | | | |
| Fundamentals, e | exception types, Built-in Exceptions, Using try-catch-finally throw- the | rows | | | | | | |
| keywords, creat | ing your own Exception subclasses. | | | | | | | |

At the end of the Module 4, students will be able to:

- 8. Demonstrate interface and its implementation. (BL-2)
- 9. Develop user defined packages. (BL-3)
- 10. Implement Exception Handling. (BL-3)

MODULE-5

Multi-Threaded Programming and I/O

11h

The java thread model, Thread Life Cycle, The main thread, creating a Thread, Creating Multiple Threads, Using isalive() and join().MVC architecture, creating a window, components and containers, Basics of components, points and rectangles, visual characteristics of components, Defining color, creating cursors, selecting Font, swing components, Layout Managers.

At the end of the Module 4, students will be able to:

- 1. Demonstrate Multi-Threaded Programming. (BL-2)
- 2. Understand MVC architecture. (BL-2)
- 3. Illustrate components of GUI in java. (BL-2)

Total hours: 48 h

Content beyond syllabus:

1. Client /Server Communication applications (Servlets, jsp).

2. Database connectivity (JDBC).

Self-Study:

Contents to promote self-Learning:

Text Book(s):

- 1. Herbert Schildt, "Java The complete reference", 9thedition, McGraw Hill Education (India) Pvt. Ltd.
- 2. Ivor Horton, Beginning Java 2, JDK 5th Edition, Wiley dreamtech.

Reference Book(s):

- 1. An introduction to java programming and object oriented application development, R AJohson-Thomson.
- 2. Introduction to java programming 6thEdition, Y Daniel liang, Pearson Education.
- 3. Java programming: A practical approach, C.Xavier, TMH, First edition, 2011.
- 4. Thinking in Java ,Bruce Eckel, 2nd Edition, Pearson Education
- 5. Java How to Program, H.M Dietel and P.J Dietel,6th Edition, Pearson Ed.
- 6. Introduction to Java programming-comprehensive, Y. Daniel Liang, Tenth Edition, Pearson ltd 2015.
- 7. E Balagurusamy, Programming With Java : A Primer 5th Edition Tata McGraw Hill.

| | COURSE CONTENT | | | | | | | |
|--|---|--------|--|--|--|--|--|--|
| MODULE – 1 | Introduction to J2EE and Networking | 10h | | | | | | |
| Java Enterprise E | dition: Java Platform, J2EE Architecture Types, Explore J | ava EE | | | | | | |
| Containers, Types of | Containers, Types of Servers in J2EE Application, HTTP Protocols and API, Request | | | | | | | |
| Processing in Web Application, Web Application Structure, Web Containers and Web | | | | | | | | |
| Architecture Models | | | | | | | | |

Java Networking: Network Basics and Socket overview, TCP/IP client sockets,

URL,TCP/IP server sockets, Datagrams, java.net package Socket, ServerSocket, InetAddress, URL, URLConnection.

At the end of the Module 1, students will be able to:

- 8. Understand J2EE Architecture Types, containers and servers. (BL 2)
- 9. Gain knowledge on HTTP Protocols and APIs. (BL 2)
- 10. Discuss web applications and models. (BL 2)
- 11. Explain TCP/IP client server sockets programming. (BL 2)

| MODULE -2 JDBC Programming | 9h |
|----------------------------|----|
|----------------------------|----|

The JDBC Connectivity Model, Database Programming :Connecting to the Database, Creating a SQL Query, Getting the Results, Updating Database Data, Error Checking and the SQL Exception Class, The SQL Warning Class, The Statement Interface, PreparedStatement, CallableStatement The ResultSet Interface, Updatable Result Sets, JDBC Types, Executing SQL Queries, Result Set Meta Data, Executing SQL Updates, Transaction Management.

At the end of the Module 2, students will be able to:

- 1. Prepare The JDBC Connectivity Model. (BL 3)
- 2. Practice on PreparedStatement, Callable Statement and ResultSet Interface. (BL 3)
- 3. Explain JDBC Types. (BL 2)
- 4. Implement SQL Queries & Transaction Management. (BL 2)

| MODULE-3 | Servlet API and Overview | 10h |
|------------------------|--|-----------|
| Overview of Servlet | , Servlet Life Cycle, HTTP Methods Structure and Deployment de | escriptor |
| Servlet Context an | d Servlet Config interface, Attributes in Servelt Request I | Dispache |
| rinterface, The Filter | API: Filter, Filter Chain. Using the Generic Servlet Class. Unders | standing |

state and session, Understanding Session Timeout and Session Tracking, URL Rewriting.

At the end of the Module 3, students will be able to:

- 1. Understand Servlet Life Cycle. (BL 2)
- 2. Differentiate ServletContext and ServletConfig interface. (BL 2)
- 3. Understand Config Cookies and Session Management. (BL 2)
- 4. Differentiate the GenericServlet and HTTP Servlet Class. (BL 2)

| MODULE-4 Java Server Pages 9h | MODULE-4 | Java Server Pages | 9h |
|-------------------------------|----------|-------------------|----|
|-------------------------------|----------|-------------------|----|

The Problem with Servlets, Life Cycle of JSP Page, JSP Processing, JSP Application Design with MVC, Setting Up the JSP Environment JSP Directives, JSP Action, JSP Implicit Objects JSP Form Processing, JSP Session and Cookies Handling.JSP Session Tracking JSP Database Access, JSP Standard Tag Libraries, JSP Custom Tag, JSP Expression Language, JSP Exception Handling, JSP XML Processing.

At the end of the Module 4, students will be able to:

- 1. Understand Life Cycle of JSP Page. (BL 2)
- 2. Explain MVC architecture and JSP Environment. (BL 2)
- 3. Construct JSP with DATABASES and exception handling. (BL 3)

4. Understand the role of XML in JSP. (BL 2)

MODULE-5Struts and Spring Frame Work10hBasics & Architecture – Request Handling Life Cycle - Building a simple struts–
Configuration, Actions, Interceptors, Results, Struts2 Tag Libraries, Struts2 XML Based
Validations - Database Access. Overview of Spring, Spring Architecture, bean life cycle,
XML Configuration on Spring, Aspect – oriented Spring, Managing Database, Managing
Transaction.

At the end of the Module 5, students will be able to:

13. Explain struts frame work. (BL 2)

14. Implement the Struts Framework. (BL 3)

15. Understand Spring Architecture(BL-2)

16. Implementation of spring to build web applications(BL-3).

Content beyond syllabus: java mobile application development.

Text Book(s):

- 1. Black Book "Java server programming" J2EE, 1st ed., Dream Tech Publishers, 2008.
- 2. James Keogh, Complete Reference J2EE,mcgraw publication

- 1. Matthew Scarpino, Hanumant Deshmukh, JigneshMalavie SCWCD, , Manning publication
- 2. Cay Horstmann and Gary Cornell, Core Java, Volume II: Advanced Features, Pearson Publication
- 3. Christian Bauer, Gavin King, Java Persistence with Hibernate,
- 4. Craig walls, Spring in Action, 3rdedition, Manning Publication
- 5. Jeff Linwood and Dave Minter Hibernate 2nd edition, Beginning Après publication
- 6. Kito D. Mann, Java Server Faces in Action, Manning Publication
- 7. Maydene Fisher, Jon Ellis, Jonathan Bruce, JDBC[™] API Tutorial and Reference, Third Edition, Addison Wesley.
- 8. Giulio Zambon, Beginning JSP, JSF and Tomcat, Apress.
- 9. Anghel Leonard, JSF2.0 CookBook, PACKT publication

| | COURSE CONTENT | | | | | | | |
|---|---|----------------|--|--|--|--|--|--|
| MODULE - 1 | Introduction to Database concepts and Modeling | 10 H | | | | | | |
| Introduction to | Data bases, Purpose of Database Systems, View of Data | , Data Models, | | | | | | |
| Database Langu | ages, Database Users, Database Systems architecture. Overvi | ew of Database | | | | | | |
| Design, Beyond | ER Design, Entities, Attributes and Entity sets, Relationship | ips and | | | | | | |
| Relationship sets, Conceptual Design with the ER Model. | | | | | | | | |
| At the end of th | e Module 1, students will be able to: | | | | | | | |

12. Understand the Purpose of Database Systems, Data Models, View of Data. (BL-2)

- 13. Summarize the concept of Database Languages, Users, Architecture. (BL-2)
- 14. Design ER diagrams for given database. (BL-2)
- 15. Explain conceptual design for enterprise systems (BL-2)

MODULE - 2 Relational Model, Relational Algebra

9 H

Introduction to the Relational Model – Integrity Constraints over Relations, Enforcing Integrity constraints, querying relational data, Logical data base Design, Views. Introduction to Relational algebra, selection and projection, set operations, renaming, joins, division.

At the end of the Module 2, students will be able to:

- 10. Understand Basics of Relational Model. (BL-2)
- 11. Describe phases of Logical Database Design.(BL-2)

12. Explain the relational algebra operations on relations. (BL-2)

| MODULE - 3 | SQL | 10 H |
|-------------------|--|-----------------|
| SQL: Basic for | m of SQL Query, DDL, DML, Views in SQL, Joins, Neste | ed & Correlated |
| queries, Operator | rs, Aggregate Functions, integrity Constraints. | |

At the end of the Module 3, students will be able to:

- 8. Construct SQL queries in RDBMS. (BL-3)
- 9. Understand integrity and security Constraints in SQL (BL-2)
- 10. Construct PL/SQL programs in RDBMS. (BL-3)

| MODULE - 4 | Normalization | 10 H |
|-----------------------|--|------------|
| Relational dat | abase design: Pitfalls of RDBD, Lossless join decomposition, | Functional |

Relational database design: Pitfalls of RDBD, Lossless join decomposition, Functional dependencies, Normalization for relational databases 1st, 2nd and 3rd normal forms.

At the end of the Module 4, students will be able to:

- 4. Analyze functional dependencies. (BL-3)
- 5. Apply normal forms on functional dependencies. (BL-3)
- 6. Understand Multi Valued Dependencies and Join Dependencies (BL-2)

| MOI | DULE - 5 | r | Fransaction M | lanagemer | nt | 9 H | | | | | |
|---|--|---|----------------------|-----------|----|-----|--|--|--|--|--|
| Transaction processing, Transaction Concept, Transaction State, Implementation of Atomicity | | | | | | | | | | | |
| and | nd Durability, Concurrent Executions, Failure Classification, R | | | | | | | | | | |
| Atom | Atomicity.Introduction to Index data structures, Hash-Based, Tree Based Indexing | | | | | | | | | | |

At the end of the Module 5, students will be able to:

- 4. Understand Atomicity and Durability, Concurrent Executions. (BL-2)
- 5. Discuss the concept of Transaction, Transaction State. (BL-2)
- 6. Discuss the Concurrency Control and various Protocols. (BL-2)
- 7. Explain indexing in database.

| | Total hours: | 48 Hours |

COURSE CONTENTMODULE – 1Introduction9HComputer system architecture, operating systems structure, operating systems operations;
Evolution of operating systems: Simple Batch, multi programmed, time shared, parallel
distributed systems, real time systems, special purpose systems, operating system services,
user operating systems interface. Types of systems calls, system programs, protection and

security, operating system design and implementation, operating systems structure. At the end of the Module 1, students will be able to:

- 4. Illustrate the structure of operating system and basic architectural components involved in operating system design. (BL-2)
- 5. Demonstrate how the computing resources are managed by the operating system. (BL-2)
- 6. Explain the objectives and functions of operating systems. (BL-2)

| o. Enpland | ine sofeen ves and renerious of operating systems. (DD 2) | | | | | | | | | |
|--|---|--------------|--|--|--|--|--|--|--|--|
| MODULE -2 | Process and CPU scheduling, process coordination | 10H | | | | | | | | |
| The process, p | rocess state, process control block, threads; Process scheduling: | Scheduling | | | | | | | | |
| queues, context switch, preemptive scheduling, dispatcher, scheduling criteria, scheduling | | | | | | | | | | |
| algorithms. Process synchronization, the critical section problem, synchronization hardware, | | | | | | | | | | |
| semaphores and classic problems of synchronization, monitor. Deadlock characterization, | | | | | | | | | | |
| methods of handling deadlocks, deadlock prevention, dead lock avoidance, dead lock | | | | | | | | | | |
| detection and re | ecovery from deadlock. | | | | | | | | | |
| | | | | | | | | | | |
| At the end of th | e Module 2, students will be able to: | | | | | | | | | |
| 5. Contrast | the process and a thread. (BL-2) | | | | | | | | | |
| 6. Develop | applications to run in parallel either using process or thread models | of | | | | | | | | |
| different | operating system. (BL-3) | | | | | | | | | |
| 7. Illustrate | the various resource management techniques for timesharing and | distributed | | | | | | | | |
| systems. | (BL-2) | | | | | | | | | |
| 8. Describe | deadlock and deadlock mechanisms.(BL-2) | | | | | | | | | |
| MODULE-3 | Memory management and virtual memory | 10H | | | | | | | | |
| Swapping, cont | iguous memory allocation, paging, structure of page table. Segment | ntation with | | | | | | | | |
| paging, virtual | memory, demand paging; Performance of demand paging: Page re | eplacement, | | | | | | | | |
| page replaceme | nt algorithms, allocation of frames, thrashing. | | | | | | | | | |
| At the end of th | e Module 3, students will be able to: | | | | | | | | | |
| 5. Demonst | rate the virtual memory, entities and attributes. (BL-3) | | | | | | | | | |
| 6. Illustrate | the mapping from virtual memory address to physical address and | vice-versa. | | | | | | | | |
| (BL-3) | | | | | | | | | | |
| 7. Identify | now a shared memory area can be implemented using virtual mer | nory | | | | | | | | |
| addresses | s in different processes. (BL-3) | | | | | | | | | |
| | | | | | | | | | | |

8. Contrast between Paging and Segmentation. (BL-2)

| MODULE-4File system interface9H | MODULE-4 | ULE-4 File system interface | 9H |
|---------------------------------|-----------------|-----------------------------|----|

The concept of a file, access methods, directory structure, file system mounting, file sharing, protection, file system structure. File system structure, File system implementation, directory implementation, allocation methods, free space management.

At the end of the Module 4, students will be able to:

- 1. List the mechanisms adopted for file distribution in applications. (BL-1)
- 2. Explain the need of memory management in operating systems and understand the limits of fixed memory allocation schemes. (BL-2)
- 3. Organize file management when designing or developing a new operating system.

(BL-3)

| | | (DL-3) | | | | | | | | | |
|--|--|----------------|--|--|--|--|--|--|--|--|--|
| MODULE-5 | MODULE-5 Mass-storage structure | | | | | | | | | | |
| Overview of mass storage structure, Disk structure, Disk attachment, Disk scheduling, Disk | | | | | | | | | | | |
| management, Sw | ap space management, RAID structure, Stable storage implement | ntation. goals | | | | | | | | | |
| of protection, pri | nciples of protection, domain of protection, access matrix, implex | mentation of | | | | | | | | | |
| access matrix | | | | | | | | | | | |
| At the end of the | Module 5, students will be able to: | | | | | | | | | | |
| 6. Illustrate th | he fragmentation in dynamic memory allocation, and identify dy | namic | | | | | | | | | |

- allocation approaches.(BL-2)7. Illustrate how program memory addresses relate to physical memory addresses, memory management in base-limit machines, and swapping.(BL-2)
- 8. Compare RAID levels of memory.(BL-2)
- 9. Illustrate various disk scheduling algorithms.(BL-2)
- 10. Understand the access control and protection mechanisms. (BL-2)

Total hours: 48 hours

Content beyond syllabus:

Linux operating systems, Multiprocessor management systems, Unix features, real time operating systems, modern operating systems.

| | COURSE CONTENT | |
|-------------------|--|----------------|
| MODULE – 1 | Physical Layer | (10H) |
| and Administrat | ta Communications, Networks, Network Types, Internet Hist ion, Protocol Layering, TCP/IP Protocol Suite, The OSI Mo Signals, Transmission Impairment, Data Rate Limits, Performa | del, Data and |
| • • | edia: Introduction, Guided Media, Unguided Media. | |
| | e Module 1, students will be able to: | |
| 1. Understa | nd the basics of computer networks. (BL-2) | |
| 2. Summari | ze the concept of Internet and its standards. (BL-2) | |
| 3. Describe | the picture of data communication with layered architecture. (| BL-2) |
| 4. Classify t | he elements of physical media used for data transmission. (BL-2) |) |
| MODULE – 2 | Data-Link Layer & MAC | (9H) |
| Introduction, Lir | k-Layer Addressing, Error Detection and Correction: Checksur | n, CRC, Data |
| Link Control (D | LC):DLC Services, Data-Link Layer Protocols, HDLC, PPP. N | Media Access |
| Control (MAC): | Random Access. | |
| At the end of the | e Module 2, students will be able to: | |
| 5. Explain l | ink layer services. (BL-2) | |
| 6. Discuss H | Error Detection and Correction mechanisms. (BL-2) | |
| 7. Describe | Data Link Control services and protocols. (BL-2) | |
| 8. Illustrate | Media Access Control Protocols. (BL-3) | |
| MODULE – 3 | Network Layer | (10H) |
| Network Layer | : Network Layer Design Issues, Routing Algorithms: The Optim | ality |
| Principle, Short | est Path Algorithm, Flooding, Distance Vector, Link State, Hier | archical, |
| | icast, Anycast, Congestion Control Algorithms, Quality of Service | |
| At the end of th | e Module 3, students will be able to: | |
| 1. Understa | nd design issues of network layer. (BL-2) | |
| 2. Explain e | fficient routing protocols in computer networks. (BL-2) | |
| | elements of network layer required for data transfer over Internet | . (BL-2) |
| MODULE – 4 | Transport Layer | (10H) |
| Internetworking, | The network layer in the Internet: IPV4 Addresses, IPV6, Internet | net Control |
| protocol, BGP. | The Transport Layer: The Transport layer services, Elements of | Transport |
| Protocols, The Ir | ternet transport protocols: UDP, TCP., Sliding Window Protocol | s, |
| At the end of the | Module 4, students will be able to: | |
| 5. Understa | nd the services provided by transport layer. (BL-2) | |
| 6. Describe | elements of transport layer required for data transfer over Interne | t. (BL-2) |
| | rate end to end communication. (BL-3) | |
| 8. Discuss p | erformance issues in transport layer. (BL-2) | |
| I | | |

Application Layer: Introduction, World Wide Web and HTTP, Domain Name System, FTP, e-mail, TELNET, Secure Shell.

At the end of the Module 5, students will be able to:

- 5. Explain the working of world wide web with HTTP, DNS. (BL-2)
- 6. Describe the protocols for mail, remote system login. (BL-2)
- 7. Discuss file transfer, network management protocols. (BL-2)

Total hours: 48 hours

Content beyond syllabus:

- 4. Connecting Devices and VPN
- 5. Peer-to-Peer paradigm

Text Book(s):

- 3. Behrouz A. Forouzan, Data communications and networking, 5th edition, Mc Graw Hill Education, 2012.
- 4. Andrew S. Tanenbaum, Wetherall, Computer Networks, 5th edition, Pearson, 2013.

- Douglas E. Comer, Internetworking with TCP/IP Principles, protocolsand architecture-Volume 15th edition, PHI.
- 9. Kurose James, Ross Keith, Computer Networking: A Top-Down Approach, 6th Edition, Pearson Education.
- 10. Behrouz A. Forouzan, TCP/IP Protocol Suite, 4th edition, Tata McGraw Hill

|--|---|-------------|--|--|--|--|--|--|--|--|
| MODULE – 1 | Introduction to Android | 12H | | | | | | | | |
| The Android 4.1 | jelly Bean SDK, Understanding the Android Software | e Stack, | | | | | | | | |
| installing the Android SDK, Creating Android Virtual Devices, Creating the First | | | | | | | | | | |
| Android Project, Using the Text view Control, Using the Android Emulator, The | | | | | | | | | | |
| Android Debug B | ridge(ADB), Launching Android Applications on a Handset. | | | | | | | | | |
| At the end of the M | Iodule 1, students will be able to: | | | | | | | | | |
| 1. Observe the features of android software. (BL-2) | | | | | | | | | | |
| 2. Underst | tand the order of Android software stack. (BL-2) | | | | | | | | | |
| 3. Discove | er and Launch an android application on a handset. (BL-2) | | | | | | | | | |
| | | | | | | | | | | |
| MODULE -2 | Basic Widgets | 10H | | | | | | | | |
| The Role of And | roid Application Components, Utility of Android API, Overvi | ew of the | | | | | | | | |
| Android Project | Files, Understanding Activities, Role of the Android Man | ifest File, | | | | | | | | |
| Creating the Use | r Interface, Commonly Used Layouts and Controls, Event | Handling, | | | | | | | | |
| Displaying Messages Through Toast, Creating and Starting an Activity, Using the Edit | | | | | | | | | | |
| Text Control, Ch | noosing Options with Checkbox, Choosing Mutually Exclus | ive Items | | | | | | | | |
| Using Radio Butte | ons. | | | | | | | | | |
| At the end of the M | Iodule 2, students will be able to: | | | | | | | | | |
| 1. Differen | ntiate the hierarchy of files and sub files. (BL-2) | | | | | | | | | |
| 2. Underst | tand the importance of Manifest file. (BL-2) | | | | | | | | | |
| 3. Select t | he widgets and group different controls for event handling. (BL | -2) | | | | | | | | |
| MODULE-3 | Building Blocks for Android Application Design | 9H | | | | | | | | |
| | ayouts, Linear Layout, Relative Layout, Absolute Layout, Using | | | | | | | | | |
| • | out, Table Layout, Grid Layout, Adapting to Screen orientation | | | | | | | | | |
| Utilizing Resource | es and Media Resources, Creating Values Resources, Using | Drawable | | | | | | | | |
| | hing States with Toggle Buttons, Creating an Images Switcher | | | | | | | | | |
| Application, Scrolling Through Scroll View, playing Audio, Playing Video | | | | | | | | | | |
| At the end of the Module 3, students will be able to: | | | | | | | | | | |
| 1. Construct an android application using layouts. (BL-3) | | | | | | | | | | |
| 2. Operate audio and video on hand set. (BL-3) | | | | | | | | | | |
| 3. Apply displaying progress with Scrolling Through Scroll View. (BL-3) | | | | | | | | | | |
| MODULE-4 Selection widgets And Fetching Information Using | | | | | | | | | | |
| | Dialogs and Fragments | 9H | | | | | | | | |

Using List View, Using the Spinner control, Using the GridView Control, Creating an Image Gallery Using the ViewPager Control.

Dialogs, Selecting the Date and Time in One Application, Fragments, Creating Special Fragments.

At the end of the Module 4, students will be able to:

- 1. Choose and select which one is the best view of list. (BL-3)
- 2. Develop customized dialogs. (BL-3)
- 3. Selecting the Date and Time in an Application.(BL-3)

| MODULE-5 | Building Menus | 8H |
|----------|----------------|-----------|
|----------|----------------|-----------|

Creating Interface Menus and Action Bars, Menus and Their Types, Creating Menus Through XML, Creating Menus Through Coding, Applying a Context Menu to a List View, Using the Action Bar, Replacing a Menu with the Action Bar, Creating a Tabbed Action Bar, Creating a Drop-Down List Action Bar.

At the end of the Module 5, students will be able to:

- 1. Prepare and produce information through menus. (BL-3)
- 2. Visualize the Action Bar. (BL-3)
- 3. Manipulate a Menu with the Action Bar. (BL-3)

Total hours: 48 hours

Content beyond syllabus: Advanced Android Programming: Gaming engines like Unity, Unreal Engine Etc..

Text Book(s):

- 4. B.M Harwani, Android Programming, Pearson Education.
- 5. Lauren Darcey and Shane Conder, "Android Wireless Application Development", 2nd edition, Pearson Education.

|--|---|---|--|--|--|--|--|--|
| MODULE - 1 | HTML, CSS &Web Servers | (10H) | | | | | | |
| HTML: Basic 3 styles, Elements Links, Lists, Tal style sheets, Lev Model, Conflict At the end of the 1. Understan 2. Explain ta 3. Construct | Syntax, Standard HTML Document Structure, Basic Texis, Attributes, Heading, Layouts, HTML media, Iframes bles, Forms, GET and POST method, HTML 5, Dynamic vels of Style Sheets, Style Specification Formats, Selector Resolution, CSS3, Web Servers- Apache, IIS, Bundle Serve Module 1, students will be able to: nd the basics of web programming. (BL-2) ags in HTML, CSS. (BL-2) static web pages using HTML tags. (BL-3) d configure web servers, bundle servers. (BL-3) | t Mark-up, HTML Images, Hypertext HTML. Cascading r Forms, The Box | | | | | | |
| MODULE - 2 | Java Script | (10 H) | | | | | | |
| Java script: Introduction to Java script, Objects, Primitives Operations and Expressions, Control Statements, Arrays, Functions, Constructors, Pattern Matching using Regular Expressions, Exception Handling, Validation, Built-in objects, Event Handling, DHTML with JavaScript., DOM Model | | | | | | | | |
| | Module 2, students will be able to: | | | | | | | |
| - | basic programming constructs of java script. (BL-2) | | | | | | | |
| - | dynamic and interactive web pages. (BL-3) | | | | | | | |
| | validations for the web pages. (BL-2) | | | | | | | |
| MODULE - 3 | PHP | (9 H) | | | | | | |
| | and Concepts: The anatomy of a PHP Page, Variables and c essions and Statements, Strings, Arrays and Functions. | data types, | | | | | | |
| 1 1 | Module 3, students will be able to: | | | | | | | |
| Compare Understa Explain v | java and php programming features. (BL-2) nd the anatomy of php page. (BL-2) various PHP programming constructs. (BL-2) nt simple PHP programs in the server. (BL-3) | | | | | | | |
| MODULE - 4 | PHP Advanced Concepts | (9 H) | | | | | | |
| PHP Advanced authenticating us Time. | d Concepts: UsingCookies, Using HTTP Headers, sers, Using Environment and Configuration variables, Worl | - | | | | | | |
| At the end of the | Module 4, students will be able to: | | | | | | | |
| 1. Understan | d cookies, http headers, sessions. (BL-2) | | | | | | | |
| 2. Explain us | ser authentication in PHP. (BL-2) | | | | | | | |
| | PHP document structure. (BL-3) | | | | | | | |
| MODULE - 5 | Extensible Markup Language | (10 H) | | | | | | |

Working with XML: Document type Definition (DTD), XML schemas, XSLT, Document object model, Parsers - DOM and SAX. News Feed (RSS and ATOM). Java Web Services: Web services Basics – Creating, Publishing, Testing and Describing a Web services (WSDL)-Consuming a web service, SOAP.

At the end of the Module 5, students will be able to:

- 1. Understand the structure of Document type Definition (DTD), XML schemas. (BL-2)
- 2. Analyze parsing of XML document with DOM, SAX. (BL-3)
- Demonstrate web service with SOAP, WSDL in Java web application development. (BL-2)

Total hours: 48 Hours

Text Book(s):

- 1. Robet W Sebesta, Programming the World Wide Web, 7th Edition, Pearson, 2013

Object recognition from structural information, Using Vision.

At the end of the Module 4, students will be able to:

- 1. Understand Syntactic analysis and semantic interpretation.(BL-3)
- 2. Demonstrate machine translation and speech recognition.(BL-3)
- 3. Gain knowledge on Object recognition and how to use Vision(BL-2)

MODULE – 5 Robotics and Philosophical foundations

9H

Introduction, Robotic Hardware, Robotic Perception, Planning to move, Planning uncertain movements, Moving, Robotic software architectures, application domains.

Week AI, Strong AI, Ethics and Risks of AI, Agent Components and Agent architectures, Are we going in the right direction, What if AI does succeed.

At the end of the Module 5, students will be able to:

- 1. Understand the basics of robotics. (BL-2)
- 2. Demonstrate robotic hardware, software and applications. (BL-2)
- 3. Understand the philosophical foundations and agent architectures.(BL-2)

Total hours:48 hours

Content beyond syllabus:

- 1. Constraint Satisfaction Problems.
- 2. Planning
- 3. Uncertain Knowledge and reasoning

Text Book(s):

- 1. Stuart Russell and Peter Norvig, Artificial Intelligence A Modern Approach, 3rdEdition, Pearson Education.
- 2. Elaine Rich, Kevin Knight & Shivashankar B Nair, "Artificial Intelligence", 3rd Edition, McGraw Hill Education.

- 1. Patrick Henny Winston, Artificial Intelligence, 3rdEdition, Pearson Education.

| COURSE CONTENT | |
|---|--|
| MODULE – 1 | 10H |
| Cyber crime: Mobile and Wireless devices-Trend mobility-authentication Attacks on mobile phones-mobile phone security Implications for organizati measurement for Handling mobile-Security policies and measures in mob Cases. | ons-Organizationa |
| At the end of the Module 1, students will be able to: | |
| 1. Analyze and evaluate the cyber security needs of an organization. | |
| 2. Conduct a cyber security risk assessment. | |
| MODULE – 2 | 10H |
| Tools and methods used in cyber crime-Proxy servers and Anonymizers-I cracking-Key loggers and Spy wares-Virus and worms-Trojan Hors Steganography-SQL Injection-Buffer overflow-Attacks on wireless network. Center At the end of the Module 2, students will be able to: Measure the performance and troubleshoot cyber security systems. Implement cyber security solutions. | e and Backdoors |
| MODULE – 3 | 10H |
| Understanding computer forensic-Historical background of cyber forensic For mail-Digital forensic life cycle-Network forensic-Setting up a computer for Relevance of the OSI 7 Layer model to computer Forensic-Computer forensi perspectives. Cases. At the end of the Module 3, students will be able to: | rensic Laboratory c from compliance |
| Be able to use cyber security, information assurance, and cyber/compu software/tools. Design and develop a security architecture for an organization. | ter forensies |
| MODULE – 4 | 10H |
| Forensic of Hand –Held Devices-Understanding cell phone working character devices and digital forensic- Toolkits for Hand-Held device-Forensic of i-poda devices-Techno legal Challenges with evidence from hand-heldDevices. Cases At the end of the Module 4, students will be able to: | stics-Hand-Held nd digital music |
| 1. Design operational and strategic cyber security strategies and policies. | |
| MODULE – 5 | 10H |
| Cyber Security – Organizational implications-cost of cybercrimes and IPR issu | es Web threats for |
| organizations: the evils and Perils-Social media marketing Security and privac | |
| Protecting people privacy in the organizations Forensic best practices for organ | nizations. Cases |
| At the end of the Module 5, students will be able to: | |
| 1. Measure the performance and troubleshoot cyber security systems. | |
| 2. Identify the key cyber security vendors in the marketplace. | |
| | |

| MODULE – 1 | 9H | | | | | |
| Cloud Computing Insights- Distributed Computing, High Performance Comp | outing, Utility and | | | | | |
| Enterprise Grid Computing, Cluster Computing, Cloud Computing fundar | nentals, Essential | | | | | |
| Characteristics, On Demand Self Service, Location independent resource poo | ling, Elastic | | | | | |
| Computing, Measured Service, Comparing cloud providers with traditional IT service providers, | | | | | | |
| Vendor Lock-in, security level of third party- Security issues: Government police | cies. | | | | | |

| At the end o | of the Module 1 | . students w | vill be able to: |
|--------------|-----------------|--------------|------------------|
| | of the mouth of | , stadents w | |

- 1. Outline the Cloud characteristics and models.(BL-2)
- 2. understand security issues in cloud computing(BL-2)

MODULE – 2

Cloud computing architecture, Layers of Cloud computing- IaaS, PaaS and SaaS, Cloud deployment models- Private, Public, Hybrid and Community Clouds, Advantages of Cloud Computing.

At the end of the Module 2, students will be able to:

- 1. Design and build cloud applications.(BL-6)
- 2. Describe the multimedia cloud. (BL-2)

MODULE – 3

MODULE – 5

Introduction, Characteristics of Virtualized Environments, Virtualization and Cloud Computing, Pros and Cons of Virtualization, Virtual machines and Virtualization of Clusters and Data Centres, Case studies – Xen Virtual Machine monitors – Xen API, VMware- VMware products-VMware features, Microsoft Virtual Server- Features of Microsoft Virtual Server, Open stack.

At the end of the Module 3, students will be able to:

- 1. Classify different models, different technologies in cloud.(BL-2)
- 2. Understand Microsoft virtual server concepts(BL-2)

| MODULE – 4 | |
|------------|--|
| | |

Cloudsim Open source framework, Simulate VMs, memory, network, disks; Aneka – Cloud computing Framework for Enterprise Cloud applications development, Aneka Architecture. Programming models: Thread, Task and Map Reduce

At the end of the Module 4, students will be able to:

- 1. Illustrate applications of cloud computing
- 2. Apply cloud computing concepts using programming models

Case studies – Salesforce.com for SaaS application development, GAE- Google App Engine, Microsoft Windows Azure – public resources for VMs and Services, AWS- Amazon Web Services – public cloud registration, Services, OpenStack – Open Source Development Platform for Clouds and tools.

At the end of the Module 5, students will be able to:

- 1. Understand Cloud computing and Virtualization.(BL-1)
- 2. Deploying SaaS application on Google App engine or Azure cloud.(BL-3)

Г

Decision Tree Induction – Bayesian Classification – Rule Based Classification – Classification by Back Propagation – Support Vector Machines — Lazy Learners – Model Evaluation and Selection-Techniques to improve Classification Accuracy. Clustering Techniques – Cluster analysis-Partitioning Methods – Hierarchical Methods – Density Based Methods – Grid Based Methods – Evaluation of clustering – Clustering high dimensional data- Clustering with constraints, Outlier analysis-outlier detection methods.

MODULE - 510HDatasets - Introduction, Iris plants database, Breast cancer database, Auto imports database -
Introduction to WEKA, The Explorer - Getting started, Exploring the explorer, Learning algorithms,
Clustering algorithms, Association-rule learners.10H

Total hours: 48hours

| | COURSE CONTENT | |
|-------------------------|---|-----------------|
| MODULE – 1 | INTRODUCTION | 9H |
| Characterization | of Distributed Systems: Introduction, Examples of Distributed | ed Systems, |
| 0 | and the Web, Challenges. | |
| System Models:] | Introduction, Architectural Models, Fundamental Models | 1 |
| MODULE - 2 | Time and Global States & Coordination and Agreemen | t 10H |
| Time and Global | States: Introduction, Clocks Events and Process States, Synch | hronizing |
| Physical Clocks, I | Logical Time and Logical Clocks, Global States, Distributed D | ebugging. |
| Coordination and | d Agreement: Introduction, Distributed Mutual Exclusion, Ele | ections, |
| Multicast Commu | nication, Consensus and Related Problems | |
| MODULE – 3 | Inter Process Communication | 10H |
| Inter Process Co | mmunication: Introduction, The API for the Internet Protocol | s, External |
| Data Representati | on and Marshalling, Client-Server Communication, Group Con | mmunication, |
| Case Study: IPC i | n UNIX. | |
| Distributed Ob | jects and Remote Invocation: Introduction, Commun | ication between |
| Distributed Objec | ts, Remote Procedure Call, Events and Notifications, Case Stud | dy: JAVA RMI. |
| MODULE – 4 | Distributed File Systems | 11H |
| | Systems: Introduction, File Service Architecture, Case Study 1 | : Sun |
| Network File Syst | em, Case Study 2: The Andrew File System. | |
| Name Services: I | ntroduction, Name Services and the Domain Name System, Da | irectory |
| Services, Case Stu | dy of the Global Name Services. | |
| Distributed Shar | ed Memory: Introduction, Design and Implementation Issues, | , Sequential |
| Consistency and I | VY case study, Release Consistency, Munin Case Study, Othe | r Consistency |
| Models. | | |
| MODULE – 5 | Transactions and Concurrency Control | 10H |
| Transactions and | I Concurrency Control: Introduction, Transactions, Nested T | ransactions, |
| Locks, Optimistic | Concurrency Control, Timestamp Ordering, Comparison of M | lethods for |
| Concurrency Cont | trol. | |
| Distributed Tran | sactions: Introduction, Flat and Nested Distributed Transaction | ons, Atomic |
| Commit Protocols | s, Concurrency Control in Distributed Transactions, Distributed | d Deadlocks, |
| Transaction Recov | very | |
| | Total hours: | 50 hours |

| COURSE CONTENT | | | | | | | | | |
|---|--|------------------|--|--|--|--|--|--|--|
| MODULE – 1 | BASICS of DIGITAL MARKETING | 9H | | | | | | | |
| Introduction To Online Digital Marketing, Importance Of Digital Marketing, How did Internet | | | | | | | | | |
| Marketing work? | Marketing work?, Traditional Vs. Digital Marketing, Types of Digital Marketing, Increasing | | | | | | | | |
| Visibility, Visitors' Engagement, Bringing Targeted Traffic, Lead Generation | | | | | | | | | |
| MODULE – 2 | MODULE – 2 SEARCH ENGINE OPTIMIZATION (SEO) | | | | | | | | |
| Introduction To | Search Engine Optimization, How Did Search Engine | work?, SEO | | | | | | | |
| Fundamentals & C | Concepts, Understanding the SERP, Google Processing, Index | xing Crawling | | | | | | | |
| MODULE – 3 | SEO UPDATES AND ANALYSIS | 10H | | | | | | | |
| Google Panda, Pe | enguin, Humming Bird Algorithm, Google Penalties, SEO T | ools For Website | | | | | | | |
| Analysis And Optimization, Competitor Website Analysis And Backlinks Building, Backlinks | | | | | | | | | |
| Tracking, Monito | ring, And Reporting | | | | | | | | |

| MODULE – 4 | SOCIAL MEDIA OPTIMIZATION (SMO) 10H | | | | | | | | |
|--|---|-------------------|--|--|--|--|--|--|--|
| Social Media Op | timization Introduction To Social Media Networks, Types | Of Social Media | | | | | | | |
| Websites, Social Media Optimization Concepts, Face book, Google+, LinkedIn, YouTube, | | | | | | | | | |
| Pinterest, Hash tags, Image Optimization | | | | | | | | | |
| MODULE – 5 | SOCIAL MEDIA MARKETING (SMM) | 10H | | | | | | | |
| Face book Optim | ization Fan Page Vs Profile Vs Group, Creating Facebook Pa | age For Business, | | | | | | | |
| Increasing Fans | And Doing Marketing, Face book Analytics, Facebook Ad | vertising And Its | | | | | | | |
| Types In Detail | Creating Advertising Campaigns, Payment Modes, Introduc | ction To Twitter, | | | | | | | |
| Creating Strong | Profiles On Twitter, Followers, ReTweets, Clicks, Conversi | ons, HashTags, | | | | | | | |
| LinkedIn Optimiz | ation, What Is LinkedIn?, Individual Profile Vs. Company P. | rofile, Branding | | | | | | | |
| On LinkedIn, Mar | keting On LinkedIn Groups | | | | | | | | |

COURSE CONTENT MODULE – 1 **10H** Introduction: Need of Agile software development, agile context- Manifesto, Principles, Methods, Values, Roles, Artifacts, Stakeholders, and challenges. Business benefits of software agility. MODULE -2**10H** Project Planning: Recognizing the structure of an agile team– Programmers, Managers, Customers. User stories– Definition, Characteristics and content. Estimation– Planning poker, Prioritizing, and selecting user stories with the customer, projecting team velocity for releases and iterations. MODULE – 3 **10H Project Design**: Fundamentals, Design principles–Single responsibility, Open-closed, Liskov substitution, Dependency-inversion, Interface-segregation. MODULE – 4 **9H** Design Methodologies: Need of scrum, Scrum practices – Working of scrum, Project velocity, Burn down chart, Sprint backlog, Sprint planning and retrospective, Daily scrum, Scrum roles-Product Owner, Scrum Master, Scrum Team. Extreme Programming- Core principles, values and

| practices. Kanban, Feature-driven development, Lean software development. | | | | | | | |
|---|--|--|--|--|--|--|--|
| 10H | | | | | | | |
| Testing: The Agile lifecycle and its impact on testing, Test driven development– Acceptance tests and verifying stories, writing a user acceptance test, Developing effective test suites, | | | | | | | |
| | | | | | | | |
| Fest automation. | | | | | | | |

| MODULE – 1 | | 9H | | | | | | |
|---|---|--------------------|--|--|--|--|--|--|
| Introduction To Virtualization System Architectures - Virtual Machine Basics- Process Virtual | | | | | | | | |
| Machines - System | Machines - System Virtual Machines - Taxonomy of Virtual Machines - Emulation: Basic | | | | | | | |
| Interpretation – Th | Interpretation – Threaded Interpretation - Pre-Coded & Direct Interpretation - Binary Translation - | | | | | | | |
| Full and Para-Virtu | alization - Types of Hypervisor- Types of Virtualization. | | | | | | | |
| MODULE – 2 | | 10H | | | | | | |
| Server Virtualizat | ion Server Virtualization - Partitioning Techniques-Hardward | e Virtualization - | | | | | | |
| Virtual Hardware - | Virtual Hardware -Types of Server Virtualization -Business Cases for Sever Virtualization-Uses of | | | | | | | |
| Virtual Server Consolidation -Selecting Server Virtualization Platform. | | | | | | | | |
| MODULE – 3 | | 10H | | | | | | |

Network Virtualization Design of Scalable Enterprise Networks-Virtualizing the Campus - WAN Design-WAN Architecture - WAN virtualization -Virtual Enterprise Transport Virtualization -VLANs and Scalability - Theory Network Device Virtualization Layer 2 -VLANs Layer 3 VRF In stances Layer 2 - VFIs Virtual Firewall Contexts Network Device Virtualization -Datapath Virtualization Layer 2: 802.1q-Trunking Generic Routing Encapsulation -IPSec L2TPv3Label Switched Paths-Control-Plane Virtualization -Routing Protocols -VRF- Aware Routing - Multi-Topology Routing.

| reperced interacting. | | | | | | | | |
|--|---|---------------------|--|--|--|--|--|--|
| MODULE – 4 | | 10H | | | | | | |
| Storage Virtualization Devices - SCSI -SCSI Communication -Using SCSI Buses - Fiber Channel -Fiber | | | | | | | | |
| | Channel Cables -Fiber Channel Hardware Devices - i-SCSI Architecture - Securing i-SCSI SAN Backur | | | | | | | |
| & Recovery Tech | niques - RAID -Classic Storage Model - SNIA Shared Storage | Model Host based | | | | | | |
| Architecture - Sto | rage based architecture - Network based Architecture - Fault | tolerance to SAN- | | | | | | |
| Performing Backup | s - Virtual Tape Libraries | | | | | | | |
| MODULE – 5 | | 10H | | | | | | |
| Applying Virtual | ization Comparison of Virtualization Technologies: Gues | t OS, Host OS, | | | | | | |
| Hypervisor, Emulat | ion, Kernel Level -Shared Kernel-Enterprise Solutions: Vm w | are Server, ESXi, | | | | | | |
| Citrix Xen Server, | Microsoft Virtual PC, Microsoft Hyper-V, Virtual Box - Serv | ver Virtualization: | | | | | | |
| Configuring Server | with Server Virtualization, Adjusting & Tuning Virtual Server | vers, VM Backup | | | | | | |
| and Migration -Des | and Migration -Desktop Virtualization: Terminal Services, Hosted Desktop, Web Based Solutions, | | | | | | | |
| Localized Virtualized Desktop-Network and Storage Virtualization: VPN,VLAN, SAN and VSAN, | | | | | | | | |
| NAS. | | | | | | | | |
| | Total hours: | 10 hours | | | | | | |

Total hours:
